Corsets and Their Relation to Women's Good Appearance

Why are some women so much more stylish than others? Is it because their clothes cost more? No, for quite often the most stylish figure is that of the less expensively dressed woman. Is it the natural figure of the woman? Not necessarily. This interesting question can best be answered by the one word—**CARE**—The brilliancy of a diamond, the delightful harmony of a skilled orchestra, the fit of a "Worth" gown, all, everything, that is worth while is reached with **CARE**.

This is most strikingly illustrated in the appearance of a well-dressed woman, and on nothing does this good appearance so much depend as upon the corset that she wears, unless it is upon the way it is put on. Every woman would be pleased to have a stylish and attractive figure, and unless she is specially blessed by nature—as few women are—the only way to have such a figure is by taking **CARE** in the selection and fitting on of her corset. She will be surprised at the improved results that can be secured by putting on and lacing her corset properly. Not only will her figure be as it should be, but it will remain so, and she will be more comfortable than when the corset is put on and laced in a haphazard style. If for the sake of style and comfort and her health, she is willing to exercise a little **CARE** and take a little time in getting her corset properly fitted, she will visit our Corset Department and consult with Miss Newport, the New York corset expert, who is here representing the "Nemo" and "Smart Set" Corsets. Our department shows also many other makes of corsets, as the following list demonstrates. In this list will be found a corset for every figure, and the most recent styles and effects for Fall.

No matter what a woman's figure, or what style of corset she may require, the same care and attention will be given by Miss Newport. Her instructions are to fit only the proper Corset to a figure, no matter whether it is a Nemo or any other style.
