

In the Museum of the School will be found a very superior collection of casts, plates, moist and dry preparations of normal and morbid tissues, and samples of medicines, for the purpose of illustrating Anatomy, Physiology, Pathology, Medicine, Surgery, Midwifery and Materia Medica.

The course of Lectures on Ophthalmic and Aural Surgery will be delivered by R. A. REEVE, A.M., M.D.

That on Sanitary Science by GEO. WRIGHT, A.M., M.D.

The Toronto Lying-in Hospital furnishes the usual opportunities for the study of Practical Midwifery. The Toronto Dispensary, Protestant Orphans' Home, House of Industry and Boys' Home, contribute also towards the clinical advantages of the School.

Senior Students will often have the opportunity of witnessing the treatment of accidents and diseases in the private practice of the Lecturers.

In order to obtain the Provincial License, all Students are required not only to pass their Medical Examination before the Council of the College of Physicians and Surgeons of Ontario, but also to matriculate before that Body; except those who have matriculated in any British or Canadian University or School of Medicine prior to the 1st of July, 1869, or who subsequently have or may become Graduates or Matriculates in Arts in such institutions.

The course of Medical Study prescribed by the Senate of the University of Toronto, for the degree of M.B., comprises all the subjects required by the Medical Council for the Provincial License. Students, therefore, who are eligible to present themselves for Examination for the degree of M.B. in that institution, are also eligible to present themselves for Examination before the Medical Council.
