CECIL B. DeMILLE Production
"FOOL'S PARADISE"
With Dorothy Dalton, Mildred Harris, Conrad Nagel, Theodore Kosloff, John Davidson, Julia Faye

SHE BLINDED HIM IN PLAYFUL MOOD. then mocked him in his misery—then pitied him—then loved him—then lived for him, fought for him; whilst he all the time thought she was the other woman with whom he was infatuated. A noted surgeon restored his sight. THEN WHAT—?

THIS IS WHAT YOU WILL SEE:
THE Mexican Border, with bandits, gamblers, soldiers of fortune. Vast and gorgeous temples in a towered City Beautiful, built on teeming lagoons.
Dances Siamese, dances Parisienne, and marvelous skating dancers, the Ballet of Lee.
Strange heathen rites of border of worshippers in jeweled cloth of gold.
Spectacular uses of elephants, bears, snakes, peacocks, crocodiles and dogs.
Revel scenes, street scenes, boudoir scenes, feud scenes, vision scenes, storm scenes, fire scenes, war scenes, water scenes.
Weaving these wonders all together into far the greatest entertainment De Mille has ever made.
NINE GLORIOUS REELS—Shows at 2.00, 3.45, 7.00, 8.45

SPECIAL PRICES:
Mat. 10c, 15c, 25c
Eve. 10c, 15c, 25c

WHILE NEW YORK SLEEPS
OPERA HOUSE

"It is thought that, in time, one will be able to go to the observation or club car on the Twentieth Century Limited and put in a call, while riding over the road, for his office at New York, to issue orders regarding business transactions; or for his residence, perhaps, to tell his wife that he forgot some of his wearing apparel, which should be forwarded on the next train.
"To realize what is liable to take place in the development of radio-telephony, one need only look back a few years to what has taken place in the few years ago the long distance telephone was limited in its range. About ten years ago the Bell telephone system succeeded, by use of the wonderful development of the vacuum tube, with other apparatus such as loading coils, in talking from New York to San Francisco, which service has now been perfected so that it is only an ordinary matter."
The Delaware, Lackawanna & Western Railroad also is conducting extensive experiments in the practical use of the wireless in the operation of trains, as well as for the convenience of passengers, and has shown that the wireless telephone is capable of much usefulness as a supplement to other means of communication.
"In the event of anything getting out of order on such a train while it is humming, the ability of the conductor to communicate almost instantly with the engineer would be a most valuable adjunct to the present methods. In handling the New York Central fleet of tug and other boats—this railroad's fleet numbers 300 units—the use of the radio telephone would be particularly worth while in time of heavy fog or other emergencies.
"To be even now no question but that the wireless telephone can be used for these purposes. It is simply a question as to whether the cost of installation and maintenance will make the adoption of the new system prohibitive and whether the apparatus can be made rugged enough and simple enough for train service. The rapid development of the new communication system indicates that the latter difficulty is likely to be overcome.
"In train service the wireless telephone service would be used not only in communication between the head and rear ends of 20 to 100 car freight trains but also between moving trains, between the conductor's office and other fixed stations. Such use would be valuable in the operation of the railroads, especially for communication between the front and rear of freight trains, some of which are a mile long.

THE ENGLISH CUP FINAL

The photo shows T. Wilson, Huddersfield captain, carrying the much coveted cup after the match with Preston North End. Huddersfield won the game by a 3 to 0 scoring from a penalty kick.

STUDY RADIO FOR TRAINS.
May Install Phones on New York Central and D. & W. Lines.

The New York Central system has a staff of wireless experts working on experiments to ascertain whether it is possible to equip the Twentieth Century Limited and other fast passenger trains with wireless telephones apparatus, so that passengers may converse with their offices or homes while traveling at more than sixty miles an hour.
Co-operating with the railroad's experts are men from the Research Department of the American Telephone and Telegraph Company. They are studying the conditions that would be encountered in the use of the wireless telephones on moving passenger trains, between the head and rear ends of long freight trains, and between the dispatcher's office and the New York Central tags and other boats that ply New York harbor.
"It is believed these problems will be mastered within a short time," says an article written for the New York Central Line Magazine, "so that the wireless telephones can be applied to practical railroading. In fact, there appears to be even now no question but that the wireless telephone can be used for these purposes. It is simply a question as to whether the cost of installation and maintenance will make the adoption of the new system prohibitive and whether the apparatus can be made rugged enough and simple enough for train service. The rapid development of the new communication system indicates that the latter difficulty is likely to be overcome.

est speed of sixty or more miles an hour for the greatest part of its journey from border to border.

C. N. R. TRAIN OF 302 CARS.
Winnipeg, May 15—A Canadian National freight train of 302 cars, claimed to be the largest on record, arrived in Winnipeg from the West one day last week.
This train, of which ninety-six cars are loaded with wheat, was drawn by a single engine, and made fast time. The wheat is destined for the head of the lakes.
The length of the train is approximately 4,000 feet, and tonnage is more than 5,000 tons.

The report of A. E. Hanson, a surveyor, on the boundaries of properties at Loch Lomond, which was made last week for the property holders, is said to differ materially from the accepted official survey. G. G. Murdoch, who made the original survey, will go over the ground again this week.

BOWLING.
In the I. O. G. T. Bowling League on Saturday evening No. 1000 took all four points from District. The scores were:—
District—Total. Ave.
