# POOR DOCUMENT

THE SEMI-WEEKLY TELEGRAPH, ST. JOHN, N. B. DECEMBER 19, 1900,

taste, but there are also very attractive sorts displayed. A list of the colors worn would be useless, as every color and shade is represented—dark and light, crade and subdued. The shirt sleeve has almost disappeared, being replaced by the plain tight sleeve, flaring at the wrist. The simplest shirt waists have a plain back and a slightly full front and fasten with flat, gold buttons. Then there are large and small tucks, fancy stitching, waists with yokes and plastrons and with various tabs, scallops, straps and other ornamental methods of fastening. Clusters of tiny metal or pearl buttons are a favorite decoration.

green cloth. The skirt is crossed in front over a platted form of black satin and is bordered by a band of yellow guipure insertion placed between two lines of black and green galloon. The bolero of green cloth is short and has half length aleves with large culfs and is trimmed to match the skirt. Under the bolero is a full bodice of black satin, and the collar, cravat and lower sleeves are also of black satin. The bat of green felt is trimmed with cream taffers having a sen dots and a bow of black satin ribbon.

JUDIO CHOLLER.

FASHION NOTES.

Sleeves, Trimmings and Other De-tails of the Wardrobe. Ribbons, ruches and puffs disposed vertically or horizontally remain a favorite trimming for dinner and theater corsages and other bodices. A lengthwise arrangement is alone permissible for women who are not slender.

The sleeve open at the wrist, with a full undersleeve fastened closely by a band finished with or without a frill, is the newest style, although the long, tight sleeve is still worn.

Stitched straps of various widths are largely appliated for a disposation.

and bodice.

Plaited skirts will continue to be worn during the winter. There are different methods of plaiting, but for cloth plaits over the hips only are sufficient, as it makes the skirt much heavier to carry them down low.

The illustration shows a mourning contemps of black india cashmers. The

The illustration shows a mourning costume of black india cashmere. The skirf is faid in stitched plaits at the sides and back, and around the foot is a deep facing of crape headed by a crape fold, which forms a Louis Quinze bow in front. The corselet and bolero are of crape, the yoke of cashmere. A crape fold outlines the yoke, with a Lcras Quinze bow in front. The tight cashmere sleeves have two folds of crape at the top and one at the wrist. The hat is smoothly covered with crape and is trimmed with bows and choux of crape.

0 indication of itself that a man was a good farmer, we said, a straight furrow. The straight furrow nearly always indicates good and correct methods of plowing. It means straight fences and things on the square all around the farm premises. It means a certain care and pride taken by the man who draws such a furrow, not only in the matter of the furrow itself, but in all his other indication of itself that a man was taken by the man who draws such a furrow, not only in the matter of the furrow itself, but in all his other farm work. It means straight business methods. It means that he cares for his tools and his stock. The fellow who in finishing up land in plowing has a piece a roll wide in the middle unplowed when he is finishing up the two ends is not only a wabbler in the matter of plowing, but ten chances to one he will find his machinery out of doors, his cow in the orchard, his wife cutting the wood to get dinner and a chattel mortgage on his team. Teach your boy to draw a straight furrow when plowing, for it means a good deal to him.

The new method to make the farm The new method to make the farm horse pay his way every day in the year is to keep good, sound, sizable mares and breed them in the fall, preferably November. The foal then comes in October when fall work is mostly finished and from then till March or April, given a comfortable box stall, she will raise a fine foal during the winter period of idleness, and when spring opens up the foal is weahed and the mare is ready to begin the spring work and will work Pork, mess

moderately right along up to the following October. moderately right along up to the fol owing October.

I have always practised working my mares right up to the time of foaling with no injurious results, as long as the mares are being fed plenty of grain. A mare of 1,000 lbs. weight worked hard up to near the time of parturition, needs not less than 14 lbs. grain, chiefly oats. Thus fed the mare with foal can be worked pretty hard. Assuming that the mare foals in October no more work is expected from her all winter, though light work will not hurt. A warm, well ventilated box stall is provided for the mare and foal; if a water basin is placed in the box stall, all the better.

With plenty of pure water all that is necessary for the mare and foal all winter is a generous allowance of hay and oats, with an occasional feed of boiled stuff, as boiled barley, but if roots are fed generously, tur-

but if roots are fed generously, turnips or carrots, there is no need of boiled messes. With an abundant supply of roots they may be fed every day. If much corn is fed it should in all cases be mixed with wheat bran, half and half by weight. The foal soon learns to eat hay and grain with its dam, and will grow right along at a surprising rate. When the warm days of spring begin to open up the mare can be taken away from the foal, leaving the box stall to the colt. All he now needs is a repetition of the feed the box stall to the colt. All he now needs is a repetition of the feed given in the winter. The grass is now or will soon be ready and this will be the best substitute for the dam's milk. — S. A. Macdonald, in Orange Judd Farmer.

A Low Poultry House.

In cold climates the poultry quarters must be built low to conserve heat. The cut shows an excellent house of this sort. The rear is but four feet high, but in the front there is height enough for even a tall per-

son, and the work can all be done in the high part. Such a building looks much better than a "shed" roofed affairs, and costs but little

By removing the sash and substituting netting, or slats, it may be converted into comfortable summer quarters.—Farm Journal.

A correspondent writes: I do not understand why more guineas are not raised. They are excellent table fowls, possessing a true gamy flavor which is not found in any other fowl. The breasts are full meated fowl. The breasts are full meated and are of the dark meat, such as the prairie chicken, quail and other wild birds. If their real value for the table were better known they would command high prices. There is not a fowl to compare with them for exterminating insects. They are never idle, being busily engaged farm they cost almost nothing, befarm they cost almost nothing, befarm they cost almost nathing, bejards such industrious foragers. Bejards and such industrious foragers and such industrious foragers. Bejards and s farm they cost almost nathing, being such industrious foragers. Besides there cannot be a hawk or other enemy within sight without the guinea giving the first alarm. The pearl guinea seems to be the favorite, but some prefer the white.

The cool nights of fall should admonish dairymen to house their cows

Unless the nights are warm and pleasant at this senson, it is wise after the evening's milking to give the cows a feeding of fodder corn or freshly cut rowen, and let them lie on dry bedding in the stable all night. The fodder can be fed to them in their mangers, and will related in a much more bountiful yield.

MATCHES. sult in a much more bountiful yield of milk in the morning than if the cows lay out through a frosty night.

National Rural.

The Three Dairy "C's." Care, cleanliness and cold are the three "c's" of milk production.

A navel officer whe has spent much time n Manula says that the women, and even young a ris, seem to grow old and faded from day to day from the effects of the climate.

He—Isn't his singing something awful?

She Den't be too hard on the poor fellow. He's probably doing his best.

He—Oh, in that case it's all right. I was affaid he was doing his worst.—Chicago News.

Bowmanville, Ont. Harmony Among Laborers.

Chicago, Dec. 17.—Men whom in the pass have bit.erly opposed each other in industrial contests filled Steinway hall at tonight's session of the conference on conciliation and arbitration, which began here today. Both the day and night sessions were taken up with papers read by representatives of capital and labor, looking to the senie end—a cure for strikes. The night session was called to order at 8 o'clock after a few introductory remarks by Franklin McVeigh, the presiding officer, Henry W. Hoyt, president of the National Founders' Association, was introduced. Mr. lioy, said that the industrial problems, so-called, must be adjusted along the lines of least resistance, and the line of least resistance in his opinion is volumbary arbitration.

The next speaker was Samuel Gompers, president of the American Federation or Labor. He received a warm welcome. The session adjourned until tomorrow after an address by Henry White, general secretary United Garment Workers of America.

WHAT IS DONE AT LLOYDS KINGS COUNTY RECOUNT.

ccentricites of Voters Marking Their Ballots.

GAIN FOR MR. FOWLER.

The Review Saturday of the Ballots Rejected by the Deputy Returning Officers Exhibited Many Curiosities--Revised Figures Will Be Announced Today.

The recount in the Kings election case was continued by Judge Wedderburn at Hampton Saturday. At the morning session of the court, the 55 ballots rejected by the deputy returning officers were reviewed. Of the number five were declared level, four for Fowler and one for clared legal; four for Fowler and one for

On a number of others judgment was reserved, including some on which a straight line was marked instead of a cross and one or two ballots where two crosses were placed opposite one candidate's name. The review of the rejected ballots exhibited a number of curiosities resulting from what may be called the eccentricity of the voter.

resulting from what may be called the eccentricity of the voter.

There were ballots not marked at all; some with a vote for each candidate; others with the cross opposite the printer's name; one with the words: "I vote for good and honest government" inscribed upon it, but in the way of derision the champion came from division No. 15, in Kingston, where the voter, in the exercise of his heritage, had drawn a character which Judge Wedderburn designated as a lobster opposite one candidate's name; another wrote "Domler," half the letters of each candidate's name while several inscribed their own titles on the ballot. A man from Sussex marked what resembled the figure "4," indicating, perhaps, as one of the counsel remarked, "how much he was getting."

After the rejected ballots were dealt with the spoiled ballots were investigated without developments to effect the figures.

figures.

The rejected ballots were more or less divided among most of the divisions. In No. 18 division there was one marked opposite the printer's name at the head of the ballot. Kingston No. 15 had one,

of the ballot. Kingston No. 15 had one, no marks being visible. In Welsford No. 10 there were two without marks, and one with a vote for the printer. No. 6, Hammond, had one blank. No. 8, Nor. ton, provided four, one with the cross not within the lines and three without marks. Studholm contributed six; two were markless, one had the name of Jas. Domville written upon it, one with half the letters of each candidate's name, one the letters of each candidate's name, one with a character resembling the figure "1," and one with a cross for the printer. No. 2 Cardwell furnished three; one was not marked, another was marked twice for Fowler and one bore the name of James Walters opposite Mr. Fowler's name. Studholm No. 13 had one with a misplaced mark. One resident in Sussex No. 18 refused to vote after his name was not the resident on the poll hook another voted.

Evangelical Alliance.

A special meeting of the Evangelical Alliance was held in the Y. M. C. A. rooms yesterday afternoon with a lorge attendance, with reference to the week of prayer, which begins January 7th. It was decided to hold union meetings as follows:

Monday evening, in Exmouth Street Meshodist church; Tuesday, St. David's; Wednesday, Brussels street; Thursday, Bitle Society meeting in Centemary; Frieday, Leinster street; Saturday, in the Congregational church. In the North End meetings will be heid as follows: Monday evening, in St. Mad hew's; Tuesday, in Victoria Street F. B.; Wednesday, Portland Meshodist; Thursday, victoria street; Friday, Main Street Baptist; Saturday, Douglas Avenue Christian.

Judge Fordes moved that the alliance exprise, its sincere appreciation of Dr. G. Gates and the sense of its loss at his departure from the city. This was spoken to by Revs. Dr. Hartley, T. F. Fohleringham, George Seel, Ira Smitch, A. F. Ph. Lips, W. W. Weddell, David Long and B. N. Nobles and was feelingly an approprietly responded to by Dr. Gates. Revs. T. F. Fotheringham and George Steed were appointed a committee to draft the resolution for insertion in the minutes and for presentation to Dr. Gates. Revs. T. Smitch presented the report of the programme committee for the next five months.

Cancer a Poison

In the system that can only be neutralized and removed by our Constitution of the programme considered and removed by our Constitution of the programme design and the same number. In Havelock No. 12 two ballots were counted for Mr. Fowler out of the two the lamb was almost the line was allowed to count. Another had the cross on the black line were six rejected ones in Waterford. On an approprietly responded to by Dr. Gates. Revs. T. F. Fotheringham and George Steed were appointed a committee to draft the resolution for insertion in the minutes and for presentation to Dr. Gates. Revs. T. Smith presented the report of the programme committee for the next five months.

Cancer a Poison

able argument during the process of reviewing. Decision on a number of the contended ones was reserved by the

ourt.

At the afternoon session Judge Wedderburn rendered some judgments on ballots which he had reserved. In the case of the division at Westfield, where the leputy returning officer had neglected to nitial the ballots, the court decided that they should count, holding that the vot rs should not be disfranchised because of the negligence of the official. A ballot marked with a blue leadpencil and two with lines instead of crosses were delared null and void. Ballots from West ield and Greenwich containing imperfec-'eld and Greenwich containing imperfections, were counted;
The court adjourned until Monday
morning, when the total figures will be
revised. The results so far, there still

Some Strange Policies.

Beyond the knowledge that it is some kind of an institution for insuring ships ion, the average man or woman without thing and perhaps cares less. Lloyds,

Against Shipwreck May be Obtained-

other reason than the diversity of the interests which it contains.

A recent visitor to the great insurance agency describes at as follows:

"Most of the members of Lloyd's carry on business as brokers or underwriters on their own responsibility. As a corporation, Lloyd's assumes no financial liability for the failure of any of its members or subscribers. But it admits to membership only men of reputation and means, who must deposit a pecuniary guarantee in order to become an underwriting and non-underwriting member, an annual subscriber, or an associate. An underwriting member must deposit with the committee scriber, or an associate. An underwriting member must deposit with the committee of Iloyd's £5,000 or £6,000, on which he receives interest and which may be returned to him three years after he ceases to be an underwriting member. He pays an entrance fee of £4,000 and an annual subscription of 20 miscos.

turned to him three years after he ceases to be an underwriting member. He pays an entrance fee of £4,000 and an annual subscription of 20 guineas. An annual subscription of 20 guineas, an associate member pays 5 guineas.

"There were in 1771 only 79 subscribers to Lloyd's. There are now nearly 1.000. The subscribers in the olden time, as now, did not confine themselves to marine insurance. They were willing to take a risk on almost anything. There is still preserved at Lloyd's a policy on the life of Napodeon Bonaparte for one month at a premium of three guineas per cent. Bank deposits are insured in Lloyd's; also, race horses, and the lives of threatened monarchs. An odd case was the covering of a risk on a glass bed packed in 20 cases for a certain sultan. Lloyd's insured the Prince of Wales jubilee stamps, guaranteeing that the issue would be successful. The voice of a prima donna has been insured. A tradesman in a London street who has an impression that a monument may fall on his shop, has taken out a policy at the nominal premium of two shillings and sixpence per cent. Gate money for cricket and football matches; animals of all sorts ashore and afloat are subjects for insurunce; policies against twins. Isody's issues insurance against burglary. Elephants are insured regularly. The life of the great Jumbo, who came to New York, an a Monarch line steamship, was insured in Lloyd's for the voyage to New York. He was not insured when the life was on a Monarch line steamship, was insured in Lloyd's for the voyage to New York. He was not insured when the life was knocked out of him by a locomotive on an American railroad whose tracks he was crossing. A celebrated einger recently took out an insurance in Lloyd's on the life of Queen Victoria. She paid a big premium on account of the age of the Queen. The reason the singer did this was not because she cared anything more than most folks for the Queen, but because her contract to sing would have been abrogated by the Queen's death, which would have plunged England into mourning and prevented the singer's appearance in opera."

Protest by the Canada Temperance League

Toronto, Dec. 16—At a meeting of the Canadian Temperance League body astrong esolution were passed condemnatory to the suggestion of Hon, A. G. Jones, that a pint of beer be given each of the re-turning contingent soldiers on arrival at Halifax, in place of lemonade. President Robertson said, in view of the position of Lord Wolseley and Lord Roberts on this question, it was difficult to understand Mr. Jones' proposition. A copy of the resolution was forwarded to Governor Jones and one to the minister of militia.

Nute Evidence of a Tragedy on the St. Paul.

Ironton, O., Dec. 14—John W. Gray, an inspector of steel works at Chester and Philadelphia, in a letter to his father, Col. George N. Gray, of this city, says the skeleton of a man has been found in the hull of the American line steamer St. Paul, now in Cramps' shipyards on the Delaware. The skeleton was in one of the ballast compartments of the vessel, and it is thought to be that of a mechanic who was working on the St. Paul and disappeared about the time it was launched, five years ago. It is supposed that he was locked in and died from starvation or suffocation.

Ironton, O., Dec. 14—John W. Gray, of the generality. Dear Sir:—Please accept my sincere thanks for yours of recent date I have given your treatment a thorough test and the benefit has been extraordinary. It has completely braced in eye is any ignorus as when a boy and you cannot realize how happy I am "Dear Sir:—Your method worked beautifully. Results were exactly what I needed. Strength and vigor have completely returned and enlarge. The skeleton was in one of the ballast compartments of the vessel, and it is thought to be that of a mechanic who was working on the St. Paul and disappeared about the time it was launched, five years ago. It is supposed that he was locked in and died from starvation or suffocation. uffocation.

TEACHER WANTED-Second-Class Male

Startling Statement by Sir Jas. Grant, of Ottawa.

# 3000 Die Annually

In Ontario Alone Through the Ravages of the Great White Plague.

Before the Canadian Medical Association held at Ottawa a few days since, Sir James Grant, the noted physician, made the startling statement that 3,000 persons die annually in Ontario from tuberculosis. Truly, consumption is the most terrible disease in the world. It is the result of germs attacking the world.

the world. It is the result of germs attacking the weak spot.

For a quarter of a century Dr. T. A. Slocum, one of the most eminent scientists of the day, has made the cure of consumption a life study and has succeeded in compounding a sy-tem of treatment which positively destroys the germ that produces the disease, at the same time building up the system and creating flesh and blood. There is no humbug about Dr. Slocum, he knows exactly what his treatment will do and affirms emphatically that it cures in ninety per cent of cases. The doctor has such confidence in the Slocum system that he offers treatment POSITIVELY FREE to all who desire it a cure. Here is the offer:

You or your sick friends can have a

L. W. KNAPP, M.D. address to Dr. L. W. Knapp, 1822 Hull Bldg., Detroit, Mich., and he will gladly send the free receipt with full directions so that any man can easily eure himself at home. This is certainly a most generous offer and the following extracts taken from his daily mail show what men think of his generosity.
