## Hoard's Creameries' Paris Exposition Butter

Among the prize-winning exhibits of American-made butter at the Paris Exposition, which were almost exclusively the product of the "Alpha De Laval" Separators, was that of the Hoard Creameries, Fort Atkinson, Wis.

Few Creameries are more widely known than those of the Hoard Concern, both by reason of the pre-eminence of "Hoard's Dairyman" as the leading dairy publication of America, if not the world, as well as of the magnitude, splendid equipment and superior merit of the output of the Hoard factories. Hence, while every big and successful creamery enterprise is to-day using De Laval separators, what the Hoard Creameries may be doing in that regard is of interest to others with less experience.

The following letter speaks for itself:

### HOARD'S CREAMERIES

(COPY)

The De Laval Separator Co.,

31 45 W. Randolph St., Chicago.

GENTLEMEN: Yours of October 29th in regard to our Paris medals received. In addition to the medal awarded our butter, our Superintendent, Mr. C. L. Fitch, received a silver medal for original processes in butter making and apparatus and tests thereof.

The cream from which the prize butter made came from two "Alpha" No. 1 Belt power machines, and from one 20th Century Turbine "Alpha" No. 1. We are using ten "Alpha" No. 1 Belt machines, one "Alpha" No. 1 Turbine, one "Alpha" No. 2 Belt, and own only one other separator—which we wish was an "Alpha" Turbine.

Respectfully Yours, HOARD'S CREAMERIES.

While the separator does not make the butter, practically all prize-winning butter is to-day made from De Laval separated cream, and there is no question in the mind of any well-informed person that under like circumstances and equal conditions any butter-maker will make better butter from an "Alpha-Disc" machine than is possible from the product of any other separator.

A De Laval catalogue will make plain the reasons for this to anyone who may not already understand them.
