Runs Easy; Sows Accurately

The "Champion" is bound to sow accurately because it is carefully tested. Both Grain and Grass Seed Boxes are set up complete, and run by machinery before leaving the factory,—so when you set your machine you are sure of the quantity you will sow.

The "Champion" has an Index that allows operator to sow as he pleases—no notches into which a shifting lever must be moved. No tying yourself down to so many bushels per acre. If there is a certain part of the field that requires a half-quart or so more per acre, simply change the "Champion" Index. You can sow as much or as little as is necessary, with the

Frost & Wood "Champion"

From conclusive tests it has been proven that the ball-bearing hub, enclosed in the dust-proof case of "Champion" Disc Drill, requires but one oiling per season. This bearing, of course, makes the "Champion" run far easier, keeps the plates snug, and adds years to the service of the machine. Certainly this feature makes the "Champion" more expensive to build—but that is just so much Extra Quality for you when you buy it.

Further, the Grass Seed Index is plainly marked for different kinds of grass seed—a convenience absent on other makes of disc drills.

Yes, indeed, Frost & Wood implements are the kind to buy if you value "Quality" in material and workmanship. You can have our disc and hoe drill catalogue if you'll just say so.
