**Burdock
BLOOD
BITTERS**

Mrs. A. Lethbridge, of Ballyduff, Ont., writes: "I believe I would have been in my grave long ago had it not been for Burdock Blood Bitters. I was run down to such an extent that I could scarcely move about the house. I was subject to severe headaches, backaches and dizziness; my appetite was gone and I was unable to do my housework. After using two bottles of B. B. B. I found my health fully restored. I warmly recommend it to all tired and worn out women."

Liquor and Tobacco Habits

A. McTAGGART, M.D., C.M.,
74 Yonge St., Toronto, Canada

References as to Dr. McTaggart's professional standing and personal integrity permitted by: Sir W. R. Meredith, Chief Justice. Hon. G. W. Ross, ex-Premier of Ontario. Rev. N. Burwash, D.D., President Victoria College. Rev. Father Teefy, President of St. Michael's College, Toronto. Right Rev. A. Sweatman, Bishop of Toronto. Rev. Wm. McLaren, D.D., Principal Knox College, Toronto. Dr. McTaggart's vegetable remedies for the liquor and tobacco habits are healthful, safe, inexpensive home treatments. No hypodermic injections, no publicity, no loss of time from business, and a certainty of cure. Consultation or correspondence invited.

MILK CANS ROB YOU

Look through a microscope at milk set to cream in pans or cans and you'll see how they rob you. You'll see the caseine—the cheese part—forming a spider web all through the milk. You'll see this web growing thicker and thicker until it forms solid curd. How can you expect all the cream to rise through that? It can't. This

caseine web catches a third to half the cream. You stand that loss just as long as you use pans or cans for they haven't enough skimming force to take out all the cream. But, just the minute you commence using Sharples Dairy Tubular Cream Separator, you stop that loss.

Sharples Dairy Tubular Cream Separators have 10,000 times more skimming force than pans or cans, and twice as much as any other separator. They get all the cream—get it quick—get it free from dirt and in the best condition for making Gilt Edge Butter. Caseine don't bother the Tubular. The Tubular is positively certain to greatly increase your dairy profits, so write at once for catalog 1-138 and our valuable free book, "Business Dairying."

many parts. Fields near Brandon were completely stripped, where the farmers had not prevented this loss by spraying with Paris green or some other insecticide. In addition to the Colorado Potato Beetle the Black Blister Beetle (*Epicauta pennsylvanica*), did much harm, appearing suddenly in swarms and eating the leaves from the plants. Remedies: The standard remedy for the Colorado Potato Beetle is to spray the potato plants either with a Paris green or arsenate of lead wash, as soon as injury by the insects is observed. Both of these insecticides may be used alone, one pound of Paris green in eighty

A CUTWORM.

Gallons of water or arsenate of lead three pounds to each forty gallons of water, or what is better still, the same quantity of poison may be mixed with Bordeaux mixture instead of plain water. This will destroy the above insects and many others, including the Cucumber Flea Beetle, which is a serious enemy of potatoes and against which Bordeaux mixture is specially effective. The Bordeaux mixture will also check several fungus diseases which appreciably reduce every year the crop of potatoes. Among these are the Early Rot and the terribly destructive Potato Rot.

In addition to the above insects there were several others of more or less importance reported but they were not the cause of serious loss. Among these, mention may be made of the Red Turnip Beetle, the Rhubarb Flea-beetle, the Western Blister Beetle, and the Diamond-back Moth. Full particulars of the life histories and methods of controlling these will be gladly sent to those who have suffered from their attacks and who are anxious to receive information.

Ottawa.

JAMES FLETCHER.

One of the rare sights at this year's International was a white Galloway. This unusual animal was sired by Scottish Standard, a well known Galloway show bull, out of a pure bred cow. She is almost pure white, having only two small black spots. In every other particular she presents the typical Galloway type. Black is the prevailing color of the breed and it is hard to think of a "shaggy coat" of any other color. In the early history of the breed, however, there were white spotted animals, and the supposition is that this heifer is a reversion to the old type. She represents one of the freaks of breeding, where a new type may be definitely fixed, but at rare intervals an individual is produced possessing some striking characteristic of the old type.

There are no hodcarriers in Japan. The native builders have a method of transporting mortar which makes it seem more like play than work—to the onlooker. The mortar is mixed in a pile in the street. One man makes this up into balls of about six pounds each, which he tosses to a man who stands on a ladder midway between the roof and the ground. This man catches the ball, and tosses it up to a man who stands on the roof.

A woman riding in a Philadelphia trolley-car said to the conductor:

"Can you tell me, please, on what trolley-cars I can use these exchange slips? They mix me up somewhat."

"They really shouldn't, madam," said the polite conductor. "It is very simple: East of the junction by a westbound car an exchange from an east bound car is good only if the westbound car is west of the junction formed by said eastbound car. South of the junction formed by a northbound car an exchange from a southbound car is good south of the junction if the northbound car was north of the junction at the time of issue, but only south of the junction going south if the southbound car was going north at the time it was south of the junction. That is all there is to it."

The EDISON PHONOGRAPH

CHRISTMAS is not a real Christmas unless there are children. No Christmas present is so good as one the whole family can enjoy. No single thing furnishes so much entertainment to a family, especially where there are children and young folks, as an Edison Phonograph. It supplies all kinds of amusement at little expense; it gives you a means of entertaining your friends.

Have you seen and heard the new model with the big horn? If not, go to the nearest dealer and see it, hear it and buy it. If you cannot do that, write to us for a complete descriptive catalogue.

We Desire Good, Live Dealers to sell Edison Phonographs in every town where we are not now well represented. Dealers should write at once to
