A BOLD MAN TO THE RESCUE

Editor Macdonald of the Toronto Globe is in Ottawa in order to size up the situation.

It is a poor sort of crisis, political or otherwise, that Mr. Macdonald isn't able to settle offhand—in his own judgment.

In fact, to polish off half a dozen of them before breakfast is child's play for him.

Well, this excellent gentleman, having sized up the situation within 'teen seconds of his arrival at the capital, sends a front-page article to his paper headed "Facing a Great Crisis." In this effusion we are told, among other things:

Certain it is the Liberals in Parliament are resolute in their opposition to this anti-Canadian naval policy of the Government. With determination at once cheerful but unflinching they take their turns day and night as sentries on duty. They believe they are guarding the citadel of Canada's self-government as a free nation in the Empire of Britain. Not alone in their speeches in the House, but in their private talk in the corridors and on the streets these men show profound conviction that the settlement of this question involves not only the national status of Canada, but also the very Empire.

By the way, talking of Reciprocity, it was this same Mr. Macdonald who acted as the forerunner at Washington of that utterly crass scheme, and then in his paper declared that Canada was ripe for it, and that Laurier would be sustained on the issue by an overwhelming majority.

Just what he didn't know about his feeling then, he evidently doesn't know now, only more so.

AN INDEPENDENT VIEW.

Says the Hamilton Herald (Independent), during the course of an article:

Yesterday the Herald said that Winston Churchill is in danger of being in the bad books of Canadian public opinion on account of his memorandum addressed to Mr. Borden on the subject of battleship competition. The article in the Herald is already there. He was there even before the issue.

What a most amusing spectacle was brought to view in the sudden about-face of the oppositionists toward the clever lord of the admiralty. For many, for months—Liberal members have been enriching and glorifying their speeches against the admiral with copious quotations from Mr. Churchill's speeches. Indeed, they had almost as much to say to the pages of Canadian Herald as the most loquacious of the opposition orators. Extracts from the speech which, torn from the context of local news, for the oppositionists, have been quoted over and over again by dozens of oppositionists, who were so fond of something original to say themselves, but who had to take the attitude of these gentlemen as they are now yelling at the admiral and denouncing and delving him. He is the newly elected "dictator" to Canada.

It is the rhetorical cyclone of British memoranda the seeds of which Mr. Churchill planted in Ottawa. Mr. Emmons protests that Mr. Churchill's belittling of Canadian declaration of independence is a bold attempt to put a curb on Canadianly the events of 1776 may be repeated north of the 49th parallel.

The Churchill memoranda are described by Mr. Emmons as a former minister of the Crown, mark them as "the most iniquitous ever submitted to the people of this country."

And what is all this lurid fuss about? December Mr. Borden wrote to the first lord of the admiralty asking for specific information about the establishment and equipment of navy yards, the construction of Dreadnought battleships and the prospects of having such work done expeditiously in Canada, and in the following months, after having consulted with the experts of the admiralty, Mr. Churchill replies to the Canadian premier giving a mass of statistical information as to naval construction, and expressing the opinion that the work of building first-class battleships could not, at present, be done expeditiously in Canada.

That's about all. There is no doubt whatever that Churchill is right. Every man who knows even the alphabet of naval matters would agree that construction of such ships could not, at present, be done expeditiously in Canada.

What does it all mean? Nothing, except that the obstructionists at Ottawa are not only disappointed and chagrined, but are so enraged and rattled at the evidence quietly produced by the premier that they have temporarily lost control of their wits. A little later they will be ashamed of the ridiculous exhibition which they have made of themselves.

DR. FRIEDMANN

Dr. Friedmann, the German scientist who thinks that he has discovered a cure for tuberculosis—and heaven knows we all hope he has—received scant treatment when he arrived in the States.

It was the first endeavor to prevent him operating at all and when he did, the New York papers described him as inefficient, unable to make a quick diagnosis and all the rest of it.

This is not the testimony of those doctors who have seen him work in Canada, in fact to the direct contrary they unanimously declare him to be an expert.

He gave an address in Ottawa yesterday before a convention of the Canadian Association for the prevention of this fell disease and his remarks were those of a sincere and evidently cultured man.

Scepticism always occurs with regard to new discoveries in medicine, or anything else.

The writer well remembers the first diphtheria case in Brantford, for which anti-toxin was administered. A little girl had been given up to die, when the doctor in attendance mentioned the new cure with enthusiasm, because its efficacy still remained to be proved.

He told the parents that he could not guarantee anything, but that it was their last chance if they consented. They did so and the child was saved. Who now doubts the value of anti-toxin, or who could doubt the value of the fact that by its use the mortality from diphtheria has been reduced from about forty per cent. to something about one per cent.

If Friedmann has secured an efficient corrective for the great white plague, countless future generations will rise up and call him blessed.

WANTS THE DOMINION TO BE NEUTRAL.

There seems to be no end to the wiggling of the Laurierite members on the navy question.

HE NOW BELIEVES IN "FRUIT-A-TIVES"

Because He No Longer Suffers With Headaches

TAYLORVILLE, ONT.

"I was a sufferer from Fearful Headaches for over two years. Sometimes, they were so bad that I was unable to work for days at a time. I took all kinds of medicine, was treated by physicians, but yet the Headaches persisted."

A short time ago, I was advised to try "Fruit-a-tives" and I did so, with most surprising results. After I had taken them for three days, my Headaches were easier and in a week they left me.

After I had taken a box of these tablets, my headaches were quite cured. My appetite was always poor and my stomach bad—and now my appetite is splendid and my digestion excellent.

I had become thin and weak from the constant Headaches but now not only have I been cured of all these awful Headaches, but my strength is growing up once more and I feel like a new man.

BERT CORNELL. Take "Fruit-a-tives", 50c a box, 6 for \$2.50—trial size, 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

herself attacked without any means of defending herself, because her ships will be in the North Sea."

Is the temper of the Canadian people a cold, a thing as this Liberal member would have people think it is? Do the Canadian people intend to stay out of a struggle involving the future of the Empire, and in which all the other British Dominions are engaged?

The record of Canada tells a better and more honorable story. The neutrality of Canada with the rest of the Empire at war would mean separation.

Who wants separation?

NOTES AND COMMENTS.

"Rattled" does not begin to express the condition of the Laurierites on the navy question.

Hon. Sydney Fisher and Hon. Mackenzie King, two Ministers who went down in the 1911 slump, are both at Ottawa making a daily effort to urge their fellow Grits to force an election if they can. They seem to think that the country is simply yearning to have them back again. Why? Neither of them possesses any outstanding ability.

The rumor is denied that the Grits intend to place a full sized picture of Winston Churchill in their caucus room at the Capital.

There must have been a big sigh of relief among the Liberals at Ottawa when editor Macdonald of the Globe arrived there to boss the job.

Over in the Old Land yesterday, two suffragette meetings were broken up by the throwing of eggs. Hen fruit must be a good deal cheaper over there.

When editor Macdonald says that the country is "facng a great crisis" does he mean himself?

When the Brantford Street Railway muddle is cleared up, as now seems likely, the city should look most earnestly into the question of the acquisition of the system and its extension. The Holmedale section, once looked upon with doubt, has paid its way right from the start. The same would doubtless be true of other sections now neglected.

You don't hear those Grits at the Capital yelling for any more Churchill correspondence.

What the Other Fellow Thinks.

As to that Churchill letter the Laurier Oppositionists would not be happy till they got it. And in the words of The London Times: "They got it. They sure did."—Toronto Telegram.

The Anti-Hydro War.

Toronto Telegram: Ontario must be given good reason to forget that N. W. Rowell, K.C., was one in sympathy with James Conmee in the great days of that statesman's warfare on public rights and one with Sir Wilfrid Laurier in all Sir Wilfrid's policies of enmity to public ownership.

The tactics of the Opposition in the Legislature aggravate Ontario's bitter remembrances of Mr. Rowell's partisan attitude towards progress and public rights. N. W. Rowell, K.C., seems to be completely in sympathy with the guerrilla warfare on the Hydro-Electric undertaking that is carried on by the most reactionary of Mr. Rowell's followers. The results of the warfare will be more damaging to the Rowell Opposition than to Adam Ebert or to the Hydro-Electric movement.

Delaying Dominion Business.

Frederick N.E., Gleaner: "There is nothing in the charge that the Government is unduly delaying redistribution upon the basis of the last census. As Mr. Borden has a majority of nearly 50 in the House, and as no general election is likely for two or three years to come, the average Canadian fails to see why pressing public issues like naval defence, the stimulation of agriculture and the reduction of the cost of living should be postponed merely to gratify a few disgruntled Oppositionists."

Closure and Party.

Toronto News—Opposition newspapers state that the application of closure at Ottawa will be violent, arbitrary, and unconstitutional abuse of power, a fraud backed by mere force.

The institutions of the country, a gross breach of the law, etc., etc.—there is no room for the rest of their bad language. If closure comes it will come wholly as a result of a beaten strong majority in Parliament and the will of the people expressed at the polls.

What makes the truculent attitude of Liberal newspapers all the more ridiculous is the fact that for a year past they have constantly applauded the use of the closure and the gullotine by the Asquith government to an extent unprecedented in any British legislature. Methods that are holy and righteous when used by Liberals are vile and unclean when employed by Conservatives.

A Pill for Brain Workers—The man who works with his brains is more liable to derangement of the digestive system than the man who works with his hands, because the one calls upon his nervous energy "while the other applies only to his muscular strength. Brain fog begets irregularities of the stomach and liver and the best remedy that can be used is Parment's Vegetable Pills. They are especially compounded for such cases and all those who use them can testify to their superior power.

VERDICT AT THE INQUEST

Death of Unfortunate Man Griffin Was Due to Alcoholism.

The inquest into the sudden death of Bert Griffin was held in the police court last evening, Coroner Fissette presiding. The following was the jury empanelled: Wm. C. W. Rutherford, jurymen, G. Jarvis, T. Crandell, A. McLean, Wm. Kieckley, T. Raynes, W. J. Springall.

Crown Attorney Wilkes conducted the questioning.

The first witness called was Mr. Campbell Smith, of Greenway St., who was with the deceased on the night in question. Witness stated deceased had come to their place exactly one month ago last night from Woodstock. In the time he had been here he had worked steadily at Adams' Wagon Works. On the night of his death they went up town, going first to Roberts and Van-Lane where he bought a pair of shoes, then to Steedman's, then to the Bodega.

"How many drinks did you see the deceased get?" asked Mr. Wilkes.

"About six or seven," replied the witness.

"What was he drinking?"

"Pure whiskey," replied witness.

Witness said he then saw Griffin was getting drunk so got him outside but Griffin went back in. At this point Smith left deceased.

Mr. McCusker, manager of the Bodega, was called. Witness stated he saw the condition of Griffin, so gave orders for him not to be served. Griffin, however, refused to leave the bar.

The bartender later called him and said they were unable to wake up the deceased, who was in the wash room, "so I went down and looked at him and thought he looked peculiar, so I phoned Dr. Fissette." The doctor came and pronounced Griffin dead.

"Did you find Griffin well dressed?" asked Mr. Wilkes.

"Yes; he was well clothed and had \$10 and some change in his pocket," Mr. Patterson, the bartender at the Bodega was the next witness.

Mr. Wilkes asked: "What time did Griffin come into the bar?"
