Place an aluminum utensil, empty, over a fire and when utensil has become heated throughout, throw into it a pint of ice-water. You will find the utensil unaffected.

THAT'S one reason why "Wear-Ever" ware lasts a generation. And there are other reasons.

"Wear-Ever"

Aluminum Utensils

Are made from thick, hard sheet aluminum, 99 per cent. pure, without joints, seams or soldered parts. No coating to peel, crack or blister. Cannot rust, cannot form poisonous compounds with fruit acids or foods.

"Wear-Ever" ware saves you food too. Aluminum utensils are less liable to scorch food than others. And even if you let them boil dry "Wear-Ever" utensils can be cleaned without difficulty and will be found uninjured.

Replace utensils that wear out with utensils that "Wear-Ever"

A new type of ship has arrived at Christiania from the shipyards of Christianiajord. The ship, which resembles a huge barge, is constructed entirely of concrete, except for the ribs, which are steel, and is the first stone vessel ever floated. It is said that the hull will resist damage better than steel or wood, and the ship is therefore safer.
