

we lined up a lot of Our New Fall Fall Shoes and told you nothing about them but the prices, you'd be impressed by the style and good appearance you could get for what you wanted to pay.

AFTER you'd worn them a while you'd have discovered a good deal morequalities of shape-keeping and durability and comfort that are none the less important for being belo v the surface. That's due to the way they're made—with more care and honesty than are put into any other footwear we know of, at their respective prices.

Electric Road Purposes Sending Out First Car on that Date

"We expect to be developing power in ten days and to send the first car out on the line on the 17th of Oc-This was the gratifying statement

made by an official of the Chatham and Wallaceburg electric road to a Planet representative yesterday. ·The line is rapidly nearing comple-

tion and, if the expectations of the management are fulfilled, will be in operation on the date named. Startoperation on the date named. Startling progress has been made with the
grading. The track is laid and ballasted for ten miles out from Chatham and for six miles out of Wallaceburg in this direction—work being pushed at both ends. The poles
have been eracted and the wiring
completed for about six miles from
the city limits.

the city limits.

In the city yet more rapid progress is being made. Connection has been made with the C. P. R. and the road completed as far as the latter's tracks on Raleigh street. Around the power house, perhaps, the best work is being done. The heavy en-gines and appliances for generating the power, weighing many tons, have been unloaded and are being placed in position. The work is under the personal direction of Chief Engineer Case. Mr. Case is an exemplification

Case. Mr. Case is an exemplification of the much-repeated assertion that this is the age of young men.

There are to be, for the present, two targe engines each developing 450 horse-power. (Provision is made in the floor space for another engine of the same size, which might be installed if the line should expand and need more power. A hall leads from ptalled if the line should expand and need more power. A hall leads from the front of the building to the engine room. Across the end of this will be placed a fence so that passengers waiting for their cars may interest themselves watching the engines in operation. The waiting rooms will be down stairs and the most of the company's offices upstairs.

The problem of carrying the power

wires across the bridge has also been solved by Mr. Case. The swinging of the bridge requires that the wires be cut and this cuts the current. be cut and this cuts the current. To remedy this he purposes running a "feed" wire underneath the water to connect with the cut wire at the other end. The bridge may then be swung without the current being cut. It will be necessary, however, that the cars attain sufficient speed to cross the portion of the bridge which is swung on account of there being no current there.

The trials of speed for the Fair on Sept. 26, 27 and 28 promise to be better than ever. Local horsemen are taking great interest in them and many entries have been received from the horses trotting at the London Fair.

and Say Precaution is Necessary.

London, Sept. 21.—Replying to a copy of the Senate resolution sent by the Governor-General regarding the cattle embargo, the Home Government, through the Board of Agriculture, refuse to take steps toward removing it. In a long memorandum they state the slaughter of cattle at the port of debarkation is no obstacle to the development and maintenance of a large and valuable trade. Existing regulations do not slur Canadian cattle, as it is enforced against all the British colonies, together with the United States.

Farmer Gored by a Bull.

Huntsville, Ont., Sept. 21.—Henry Hares, one of the best known fesi-dents of Stephenson Township, has been brought to the General Hospital. He is in a critical condition, the re-sult of being gored by a bull. Mr. Hares, who is nearly seventy years of age, was leading the animal to pasture, and when releasing the brute turned and attacked him feroclously. The injured man's little son, aged 14 years, ran to his father's rescue and attack until two of the elder sons finally drove the infuriated beast away. The aged man was found to be ser-lously hurt, one horn penetrating close to the abdomen several inches, and while everything possible is being done, there is not much hope of his

## A Regular Capt. Kidd Crew.

Washington, Sept. 21.—Capt. Alexander McLean has been arrested at Victoria, B. C., by Canadian authorities, at the request of the American Consul, under an indictment obtained more than a year ago at San Francisco an a charge of conspiracy in fitting out the schooner Carmencita, in vio-lation of the coaling laws. A telegram received at the State Department yesterday, announcing the arrest, says that the Carmencita had been refitted under the name of the Acapullo, and with a crew said to be as "choice a band of robbers and cut-throats as have manned a pirate's craft since the days of Capt. Kidd."

Struck By Shower of Stone.

Struck By Shower of Stone.

Keewatin, Sept. 21.—About 4 o'clock yesterday at the new flour mill being erected for Keewatin Flour Milling Co., the men were struck by rock which was being blasted out for foundation of the mill. The rock penetrated the side of the building, which is about 150 feet from where the blasting was done, striking Joseph Kennedy and Elijah Watterson on the head. Kennedy is probably fatally injured, but Watterson may recover. Both are unmarried.

Two Tragic Deaths.

Edmonton, Sept. 21.—Alvis Hag-man, the 5-year-old son of John Hag-man, a farmer near here, was playing in a field and started to ride a horse to where his father was working. He was thrown off and trampled to death.

# WILL BE TORN UP NEW

Head Street Spur to go, But, in the Meantime Paving is Delayed

There is every possibility that the P. M. spur on Head street will be torn up as a result of the city's action in repealing the by-law under the authority of which the tracks were put down. Thirty days, how ever, is granted the company in which to fyle any objections they may have to the course the Council is pur-

to the course the Council is pursuing.

In the meantime the work of paving Head street is held up until the tracks are removed and, if the railway company insists upon their thirty days' notice, the work cannot be proceeded with until the expiry of that period. This means that, unless the railway company waive their rights, the work cannot be proceeded with this fall.

# NOT TALKING

Mayor Cowan Will, However, "Deliver the Goods" if Occasion Demands it

The Mayor was not in this morning when called upon by a Planet reporter. Knowing that the School Board had met, our representative telephoned the local undertaking establishments only to be met with the response they had not yet received the "job." Further continua-tion of this was given when His Worship walked in evidently as care-free as if there were no such thing as School Boards.
"Nothing to say to-day," was his answer to the daily query. "Yes; I see the School Board met this morn-ing Wall: I shall wait until I see ceived the "job." Further confirma-

see the School Board met this morning. Well; I shall wait until I see their hand before talking. When the time comes I shall deliver the goods and," he continued impressively, "perhaps I have a little dry powder left to start another blaze."

"My quarrel is not with the School Board as a whole—only with those Board as a whole—only with those members of it designated or referred to. Of course I object to the method of the election of the whole Board," he concluded.
