MYSORE INFANTS MUST NOT MARRY. The maharajah of Mysore has resolved to put down by an act of the legislature the custom of infant marriage among his subjects. A bill to that effect was published last year. After a good deal of discussion the measure has now assumed a definite shape and form. When the act is enforced any person causing or abetting infant marriages, or any person of eighteen or over eighteen marrying an infant girl will be punished with imprisonment of either description, which may extend to two years, or with fine, or with both. The same punishment is prescribed for any man who, having completed fifty years of his age, marries a girl under fourteen years. Six months' imprisonment or fine, or both, will be meted out to the abettor or abettors of this offence. All girls under eight years of age will be con-

sidered infants under this law.

A STRANGE TRIBE IN MAINE.

A Sect of Wild and Hairy Barbarians

A writer in the Boston Herald says In the town of Brighton, about twenty miles north of Skowhegan, in the woods bordering on the little village of West Athens, there lives a tribe of men that would in some respects, put to blush the uncivilized cave dwellers of years agone, and give points to the now somewhat enlightened savages of the Fiji Islands. For years they have been the terror of the country for ten miles around. They subsist mainly on sheep and cattle that they steal, and when an honest turn

strikes them they vary their stolen bill of fare with partridges or trout. There are, as near as can be ascertained about forty of these uncivilized creatures, a few of whom are females. They are and are largely inbred, according to the testimony of their long-suffering neighbors. They dwell in rude huts or shanties, and some of the younger and more enlightened of them make occasional feeble attempts at agriculture, at least to the extent of raising a few potatoes or

planting a rocky half-acre of corn. Only a few of these people are often seen by the neighboring folk, who are thrifty and law-abiding farmers, and they are not particular about cultivating the acquaintance of the rest, who are supposed to be worse and more degraded than the samples which occasionally visit neighboring towns after an overindulgence in hard cider, which is their steady beverage, as it is very difficult in that country to find rum to steal. The younger members of the savage tribe are more intelligent than their parents as a rule, but they are all wild enough. It is doubtful if any of these people can read or write. Among them are many who cannot even speak any language, and are able to converse with each other only by grunts and guttural sounds entirely meaningless save to the ears of a brother savage. These wild men-for there are none more wild in America-have no respect for the laws of the land in which they dwell, and it is doubtful if they realize any law. They are in some respects of an anarchistic turn of mind, in that they believe they have a

have lost more cattle and sheep during the last twenty years than any other dozen towns in Maine and the sufferers lay this wholesale thieving entirely at the doors of the untutored Browns. During recent months their losses have become so frequent, especially of sheep and lambs, that the good farmers thought it was high time something was done to put a stop to them, and accordingly the Sheriff was sent down into the territory of the thieves to try and arrest one or two of the nost active. He was welcomed by a couple of loads of buckshot, and did not stand upon the order of his returning to the haunts of civilized men, but returned at once and finally. Thereupon a constable at Brighton, who is also tax collector, and had a slight acquaintance with some of the gang, tried his hand. He called on one or two of the creatures whom he knew, and by dint of persuasion and promise of dainties succeeded in enticing four of the tribe to Norridgewock and into

the county gaol, when the strong doors were locked upon them. And there they are today. No prisoners ever created so much curiosity among the people of Norridgewock and the surrounding country as do these wild and woolly denizens of the forest. Gaoler John Smith, a kindly man, with a long white beard, who has kept the gaol for some years, and who, with his family, lives in the building, says that the train wreckers Gregg and Gurham, ho were confined here last autumn and who had hundreds of visitors, did not attract one-tenth of the curious who now call hourly for a glimpse of the men. When captured they wore scarcely anything that could be called clothing, and were almost naked. The bodies of the two elder were covered with a thick growth of black hair. Since their arrival the gaoler had procured shirts and overalls, and these they now wear.

When an eighth of mile distant the shouting of the wild men could be plainly heard, and in volime and character it was calculated to send a cold chill down a man's spinal column. They are all kept in one cell, and howl almost perpetually, save when

Their hands and feet are black with dirt, and their faces not much better, while portions of their body exposed could be seen to be covered with pearance of beasts. The uncle, Gabe, is very strong, and easily carries the others on his back around his cell. This man has been harnessed to a rude sled, and in lieu of a horse, hauled many a load of wood to the home of the tribe. He is a giant in stature, and one would scarcely care to be favored with an introduction to him in his native wilds.
