

Large as a Dollar

Were the scrofula sores on my poor little boy, sickening and disgusting. They were especially severe on his legs, back of his ears and on his head. His hair was so matted that combing was sometimes impossible. His legs were so bad that sometimes he could not sit down, and when he tried to walk his legs would crack open and the blood start. Physicians did not effect a cure. I decided to give him Hood's Sarsaparilla. In two weeks the sores commenced to heal up; the scales came off and all over his body new and healthy flesh and skin formed. When he had taken two bottles of

Hood's Sarsaparilla
he was entirely free from sores. HARRY K. RUBY, Box 356, Columbia, Pennsylvania.

HOOD'S PILLS are a mild, gentle, painless and efficient cathartic. Always reliable.

THE TURF.

LAMPLIGHTER LAID OFF.
New York, May 3.—Lamp-lighter will not start in the race for the Brooklyn handicap. He was troubled with a small splint a few weeks ago, which kept him sore in one of his forelegs. Mr. Waulbaum said this morning: "I will not start Lamp-lighter, and I want everybody to know it, as I do not want the admitters of the horse to lose their money by betting on him for the race. It is a pity he went wrong, but it is one of the chances men take in races."

THE CHESHIRE HANDICAP.

LONDON, May 3.—At the Chester meeting to-day the race for the great Cheshire handicap stakes was won by Jardine's Sarawak; Lowther's Hermion, second; Gardner's Streetsinger, third.

BIG TROTTING MATCH AT BUFFALO.

BUFFALO, N. Y., May 3.—A match has been arranged between Hamlin's Nightingale (2:10) and O'Dell's Greengrass (2:12), to be trotted at the Grand Circuit races here for a \$3,000 purse. Each owner has posted \$500 forfeit. The conditions are best two heats in three, distance two miles—for which Nightingale held the record at 4:33 until Greengrass captured it by trotting two miles in 4:32. Greengrass is 11 years old.

ATHLETICS.

At Kingston, on Wednesday night, Sergt.-Major Morgan of the Royal Military College, defeated Instructor Clarke, of New York, late of England, by 23 points to 10 in a fencing contest.

FOOTBALL.

At Berlin, the Rangers and Mechanics played a match on Thursday. The Mechanics took the game by default.

SPRINTING.

TORONTO, May 3.—A matched foot race has been made between Tom Humphrey, of this city, and Smith, of Albany, N. Y., two of the fastest long-distance runners on the continent. The match will be for \$300 a side and the gate receipts.

THE WHEEL.

OPPOSED TO CARELESS RIDING.

The regular monthly meeting of the London Bicycle Club last night lacked none of the enthusiasm which has been so dominant at all the gatherings of the club. The attendance was very large. President Percy Carroll occupying the chair and Mr. Bert Glover acting as secretary.

The practice of careless riding on city streets, as indulged in by some wheelmen, was strongly condemned by the passing of the following resolution, which carried unanimously: "That the London Bicycle Club strongly condemns

the practice of fast and careless riding in the principal streets, and all members of this club are requested to take every care to in no way endanger the safety of pedestrians, and also requests every bicycle rider in the city to observe like care in riding on the city streets."

The racing board presented a report stating that they had decided to hold a series of handicap races, one to be run every month. The races will be decided by points, and the rider having the largest number of points at the end of the series will be awarded a handsome prize. The next race will be run on May 29.

During the past month several wheels while left in the hall have been punctured by a crowd of boys who hang about the building. The practice has now become too common, and the first person caught will be severely dealt with.

Mr. Bert W. Glover, the obliging secretary, was presented by the club with a handsome gold-headed cane as a slight appreciation for the energetic manner in which he has performed his duties. Dr. Balfour made the presentation, and Bert replied.

Preparations for the meet on May 24 are being made, and it is now an assured success.

The membership roll was increased by 27, making it now 126, with prospects of another large addition at the next meeting. Mr. John Millar was elected club reporter, to fill the vacancy caused by the resignation of Mr. M. W. Rossie.

SPOKES.
About twenty members of the Meteor Bicycle Club took a run to Lambeth and back last night. They left at 7:30, and on the return trip made fast time.

The Meteor Club have secured new club rooms. They are situated in the Nitehawk camp, very commodious, and will be occupied in a short time.

A dozen of Rochester, N. Y., clergy-men are bicyclists.

It is estimated that Copenhagen, Denmark, has more bicyclists than any other city. They ride throughout the winter, and with the advent of spring the riders turn out by thousands. Doctors, business men and workmen and ladies use the bicycle both for recreation and to save time. Cycling is very popular with the women and the well-to-do persons.

The English Cyclist says that cleaning cork handles once a week with a little turpentine in soap and water will keep them in a condition almost as bright as when new.

THE MEYER MURDER TRIAL.

Startling Testimony by John Gardner—Scheme for Swindling Insurance Companies.

New York, May 3.—At the trial of Dr. Henry C. F. Meyer for the poisoning of Ludwig Brandt, Mr. Brooke tried to learn the cause of Mueller going back on Dr. Meyer during the cross-examination to-day.

Mueller said: "Because he tried to poison my wife."

Assistant District Attorney McIntyre produced several letters, and then asked Mueller who had written them. The witness said Mrs. Meyer had. Mueller said Mary Weiss was a servant in the doctor's house when he met her first in Toledo. She lived with the witness at 395 Dearborn street for some little time before they were married. He said he took the girl to live with him to save her from being poisoned by the doctor, as her life was insured for \$5,000 in favor of Meyer.

John Gardner met the doctor in Cook county (Illinois) jail, and there Dr. Meyer told him he had a good scheme for swindling insurance companies. After both were released it was agreed in Chicago that Mrs. Meyer was to act as the widow of Brandt, who was to be killed in Detroit. The sum was \$7,500. The witness caused a sensation when he said: "Dr. Meyer told me that he would poison Brandt, as he was a worthless fellow, sat around all day, drank whisky and smoked cigarettes." Witness also related other remarks of the doctor in connection with the proposed killing of Brandt.

Crazy.

WILKESBARRE, Pa., May 3.—Jacob Gould, a relative of the late Jay Gould, was adjudged insane yesterday. He was one of the wealthiest residents in Salem township, but developed the insane idea that his property was depreciating in value. He sold valuable tracts for very small prices. When placed on the stand he was unable to tell the value of different kinds of money shown him.

The Typewriter's Death—Release of Magee.

New York, May 3.—The grand jury to-day, after three days' deliberation on the case, failed to find an indictment against Joseph F. Magee, the lawyer who was placed under arrest on suspicion of having been implicated in the mysterious murder of Martha Fuller in Lawyer Mullins' office on March 17. As a consequence the young lawyer was discharged from the Tombs.

Mishaps in Windsor.

WINDSOR, May 3.—While playing in the yard of the Central school yesterday Alice, a young daughter of Secretary Watts, of the Windsor Football Club, fell, striking her head on a curbstone. Dr. Reesume put several stitches in her forehead, and it is feared she will be disfigured for life.

Alex. Nelson, of the hardware firm of Nelson Bros., was struck by a baseball while walking on Ferry street, and is confined to the house with a black eye.

A lawn mower deprived a young son of George Christie, of the firm of Morton & Christie, of a finger.

Marie Tempest—May 11.

There has been no light opera prima donna on the western continent since our musical public have become patrons of comic opera that has been accepted, feted and glorified as has that dainty little bundle of nerves and vivacity, Miss Marie Tempest. She seems to ignore the rocks on which other stars have been wrecked, and glides through the breakers of Bohemianism without a scratch. It is not long since she was the guest of honor at the annual dinner of the Tenderloin Club in New York, an organization composed entirely of literati, Bohemians, artists and free lances. She responded to the toasts gracefully, and gracefully accepted the honors that were bestowed upon her with the dignity of a queen. She was wrapped in her ermine cloak and was escorted to her carriage at the end of the festivities by the entire club. She was as eagerly sought for to ornament a 5 o'clock tea table at Sherry's, a reception at Murray Hill or a fashionable crush or breakfast. Her collection of autographs and her scrapbook of invitations includes not only the cards and compliments of a score of crowned heads and individuals of the male sex, but a much more treasured bundle of invitations and complimentary notes from the wives and daughters of many of the most prominent people of Europe and America.

Miss Tempest will be seen here in the leading soprano role of "The Fencing Master," supported by the Whitney Opera Company, on Friday, May 11.

Try Derby Plug Smoking Tobacco, 5, 10 & 20c Plugs

Coming Slowly.

Continued Decline in Emigration to Canada.

Lord Salisbury Has Bitter Words for Irishmen.

Probable Retirement of Speaker Hon. Arthur W. Peel.

Tourists Scared Away From This Continent by Reports of Disease and Quarantine Rules—John Burns, the Labor M.P., Hurt With a Cricket Ball.

Privy Council Decision.

LONDON, May 3.—In the Privy Council to-day judgment was delivered in the case of Hoggan vs. the Esquimaux and Nanaimo Railway Company in favor of the respondents with costs.

John Burns, M.P., Injured.

LONDON, May 3.—John Burns, M.P., was severely injured about the face to-day by being struck with a cricket ball while watching a game at Battersea. His eyes were blackened and his face was badly bruised and cut.

Wanted to Kill.

LONDON, May 3.—In Old Bailey Court this morning the Italian Anarchist Joseph Farrai pleaded guilty to the indictments against him. In explanation he smilingly declared his object was to kill a capitalist.

Balfour's Toasted.

LONDON, May 3.—The Times deprecates Mr. Balfour's part in the bi-metallics' cavement. It says: "No man can combine the incompatible functions of an apostle of facts and a responsible statesman without incurring the unpopularity of the masses." It is also criticized and rebuts Mr. Balfour's arguments.

Speaker Peel May Retire.

LONDON, May 3.—It is stated on good authority that the Rt. Hon. Arthur Wellesley Peel will retire from the Speakership of the House of Commons within a short time. The reason given is that Mr. Peel is to be elevated to the peerage.

Upon equally good authority the statement that the Speaker intends to retire is emphatically denied.

Imprisoned in a Cave.

GRAZ, Austria, May 3.—An additional party of rescuers have started for the stalactite cavern near Sauriach, Styria, to release the tourists who have been imprisoned in the cave since Saturday last. The original rescuing party have been obliged to stop work on account of the high water caused by the floods. It is known that the cave-exploring party are alive, and it is believed that they will soon be set free.

Rosebery's Advice.

LONDON, May 3.—Lord Rosebery spoke at a luncheon in Manchester to-day. He the Liberals wished to maintain a real hold on the masses of the country, he said, they must, when laboring for the good of all classes at home, study most zealously and persistently the best means of maintaining the greatness of the empire abroad. By the greatness of the empire, he explained, he meant business, besides the glory of power, commercial and other practical advantages.

The Tough Old Man.

BERLIN, May 3.—Prince Bismarck received at Frederickshagen to-day 500 delegates from the military societies of Holstein. He thanked them for the address which they presented to him, and made historical speeches. It was gratifying to him, he said, to receive such demonstrations of respect long after his retirement. He ridiculed those who accused him of as being a new rank and titles, and ended his address with a call for cheers for the Emperor.

Greece Shaking Still.

ATHENS, May 3.—A Russian warship has left large quantities of bread at several points recently damaged by the earthquakes, and has landed timber to be used in building huts for families which have been made homeless.

A Strong shock, which was felt throughout Greece last night, completed the demolition of many houses already half-wrecked, but as far as is known did not cause any deaths.

Memorial to a Famous Doctor.

LONDON, May 3.—The Duke of Cambridge presided over a meeting which was held in Princess Hall this afternoon for the purpose of perfecting arrangements for the erection of a memorial to the late Sir Andrew Clarke.

Mr. Gladstone offered a motion providing for the erection of a memorial and said he was glad to testify to the high and noble character of Sir Andrew Clarke, who had in recent years watched over him with almost paternal affection.

Mr. Gladstone looked well, but leaned heavily on his cane in entering the hall and remained seated while he spoke.

Tourists Scared Away.

LONDON, May 3.—The announcement that smallpox is epidemic in New York, Chicago and other cities of the United States, coupled with the confirmatory statement that the Dominion Government had imposed quarantine regulations on the frontier, has already had a visible effect in restricting travel in the direction of America. Six tourists this morning, booked in one leaving office for Canada via New York, canceled their passages and the prospects are that their example will be followed.

Emigration to Canada Still Declining.

LONDON, May 3.—Emigration to River St. Lawrence ports from England continues to decline. The total number of emigrants from Liverpool by the first four Allan and Dominion steamships this year was 770, as against 3,100 by the first four ships last year. Emigrant through agencies, like the Self-Help Society, Dr. Barnardo's schools and charity organizations, alone seem active. Other emigration work generally seems lifeless, although the Canadian Government and the Canadian Pacific Railway Company continue an active propaganda.

Copyright Contention.

LONDON, May 3.—A letter appears to-day in the Times signed by Mr. Dalby, secretary of the Copyright Association, which charges the Canadian Government with seeking to undermine the copyright

law in the interests of the Dominion. If the Imperial Government, it says, yields to the demand of Canada to repeal the British Copyright Act, so far as they relate to Canada, and denounce Canada's connection with the Berne convention, then the whole principle of our copyright legislation will be reversed, and our relations with the States included in the Berne convention will be upset or else materially changed.

Railway Strike in Ireland.

DUBLIN, May 3.—The employees of the Great Northern Railway of Ireland have given 24 hours' notice of a general strike. Their dispute with the directors concerns hours and wages, and all efforts to settle it by conference have failed.

Richest Men in Germany.

BERLIN, May 3.—The Prussian income tax enables the people to learn once a year how many millionaires they have in the country. The list for 1893-94 shows that the richest men in Prussia had an income of \$2,600,000. He lives in Darmstadt, but his name has not been made public.

Krupp, the maker of great guns, is next in the list of Prussian millionaires. His annual income is almost \$2,000,000. Krupp's tax is \$72,000 a year, the Darmstader's \$109,000. Rothschild in Frankfurt-on-the-Main takes third place with an income of \$1,210,000. Before the death of Baron Bleichroeder, the Berlin banker, whose income was \$1,000,000, the capital had for years third place on the millionaires' list, but it now has a poor fourth. Its richest citizen draws an income of but \$1,100,000. Then comes a Bremen banker with \$1,080,000, a Berliner with \$1,051,000, another Berliner with \$875,000. The so-called millionaires in Berlin—there are about 75—show now number 426, against 440 one year ago. In all Prussia there are but 1,332 persons whose incomes exceed \$25,000. Last year the number was 1,381. Berlin has but twelve citizens whose incomes exceed \$250,000 a year.

Salisbury's Opinion of Irishmen.

LONDON, May 3.—Lord Salisbury spoke in Trowbridge this evening on the Government's attitude to the House of Lords and Irish home rule. As far as he could see, Lord Salisbury said, the country regarded the House of Lords as a very good institution for checking the errors of the House of Commons. Speaking of home rule and the Irish in America, he said: "We have many friends in America who are proud to believe that our friends are the large majority, and I hope that the Irish majority will always continue. If the majority of Americans would venture to speak their minds they would, I believe, describe the Irish minority with whom they have to struggle in language more vigorous than I would venture to use. If any class in America is to be considered I would rather concede the class that loves us, not the class that pursues us with undying hatred. If the object of the Liberals be to give practical independence to Ireland the result would be that the Irish in America would then have within four hours of your coast the most bitter enemies of England. They would command all your trade routes and menace all your ports. You would have for your nearest neighbor an island under the domination of men who have shown their hatred of England by terms and actions which do not permit us to doubt for a moment either their sincerity or permanence. Are you going to hand your brethren in Ulster over to such tyranny, which they do not cease to dread, which they are pledged to resist by every means in their power?"

HOW IT HAPPENED.

Cause of the Terrific Landslide in Quebec—Another Disaster Feared.

MONTREAL, May 3.—A special from Quebec says: "Judging from all the reports of the disaster at St. Albans so far to hand it is evident that the cataclysm was entirely due to the undermining of the ground by water above the falls where the earth was thrown into the river and completely shut off the water which was dammed back till a depth of 75 feet was reached. Then the river changed its course and washed away the earth for a mile and a half long and about a mile wide and to a depth of 100 feet. Seven houses were carried away and four lives lost besides a great number of domestic animals. There is said to be great danger of another terrible disaster at any moment. This morning to the general surprise St. Amos River was found to have fallen several feet, but it was also discovered that the river had again become blocked and that a gigantic dam had formed above the Church of St. Albans, backing the water and giving rise to a regular lake of several miles in length and width, with a depth of nearly 150 feet. When this dam gives way the effect may be disastrous."

70 AND 23.

A Mummified Multi-Millionaire Marries a Young Girl.

DENVER, May 3.—Denver, socially and otherwise, received a shock last night that will not be forgotten in a hurry. At St. John's Episcopal Cathedral Dean Hart, the pastor, stood before the imposing altar, and quietly, without any gathering of spectators, united the fortunes of Henry C. Brown and Miss Mary Louisa Matthews, a modest and unassuming school teacher, the daughter of an old mining friend of her husband. The groom is 70 years of age and the bride 22. Mr. Brown's wealth is estimated at \$4,000,000, the Brown Palace Hotel and site being appraised at \$2,500,000. His family knew nothing of the engagement.

Sale of the Inter-Ocean Newspaper.

CHICAGO, Ill., May 3.—The controlling interest in the Inter-Ocean newspaper property was to-day transferred by H. H. Kohlhaas to Wm. Penn Nixon, who has been editor of the paper for more than eighteen years. The consideration was about \$400,000.

STRANGERS in China have the greatest difficulty when meeting a funeral or wedding procession on the street to distinguish one from the other. The same red cloth coolies, carrying roasted pig and other dainties, appear in the procession, the same smaller coolies carrying cheap paper ornaments, and the same noisy train. And all this when some old person is being carried to his last resting place, as when the youngest and most beautiful of celestial maidens is being carried to the new home prepared by her husband. The crowd at the funeral is as noisy as at a wedding and the guests at the wedding are carried in an inclosed sedan chair, borne on the shoulders of some men, and followed by her bridesmaids. In that of the other the coffin is carried and the mourners follow. Indeed, an English writer says that no event in the life of a Chinaman is so important as his funeral.

EAST MIDDLESEX TEACHERS.

AFTERNOON SESSION.

Mr. Liddicott gave a very interesting report of the work done at the Provincial Association, dwelling particularly on the proper relation of information to education and the value of supplementary reading. He complimented Mr. McQueen, of South London, on his address on the future of our schools.

Mr. Dearness referred to Dr. Brenner's photographic and life illustrations of the effects of wrongly-constructed seats and desks upon the spine and skeletal system of children. He also quoted the institute inspector's surprise that teachers at their assemblies referred to the greater part of the time being taken up with the discussions of the best methods of teaching.

Mr. J. W. Plewes, school section No. 4, Delaware, demonstrated his method of teaching addition. He dwelt strongly on the principle that concepts of the numbers should precede the work with the figures. He would teach elementary adding by the use of sticks, dots and other objects. He showed devices to gain practice in adding by reading the terminations. The efficiency of his method was proved by the adding of a class of children who had been only one year at school. These children added from 50 to 70 figures per minute. Their efforts were much applauded.

Mr. Dearness reviewed the exhibits from the different states and nations as shown at the World's Fair, and the work at the two educational congresses. The review was interesting and instructive. Many of the methods and devices described, some of them quite novel, were such as can be introduced into rural schools.

Mr. W. T. Ames, Lieury, introduced suggestions from a study of the work of public schools of Seattle, dealing more particularly with the course of study in language and composition. Language being the expression of ideas by means of words either written or spoken, it follows, necessarily, that the development of ideas must precede the study of words, their relations and uses. Object or observation furnished the material for the development of the pupils' ideas. The outline of the work should be systematic and logical, going from one step to another carefully and patiently. The general directions are: 1. Train the pupil to observe things. 2. Train him to tell the result of his observations by means of correct language. 3. Train him to write the result carefully. A brief outline for the study of the subject was then given.

Steamship Arrivals.

May 3. At Quebec.....From New York

At Vancouver.....From New York
At Schiedam.....From New York
At New York.....From Bremen

The silk industry in Italy and the Italian province of Austria will be benefited by a discovery to which the French consul at Trieste recently called attention in his official reports. He announces the existence of a new silkworm, which would give a cocoon larger than that given by the ordinary insect. The silk would be finer also and snow white.

It is said that the late Ottomelli Wood, a well-known character of New England, was summoned as a witness in court. When he was called and sworn, the judge, not catching his name, asked him to spell it, whereupon Mr. Wood began: "O, double t, o, double u, e, double l, double o, double o, d." The judge was too tickled to grasp the meaning of this string of words and letters, and throwing down his pen in despair, exclaimed: "Most extraordinary name I ever heard; will you write it for me, Mr.—Mr.—Mr. Witness?"

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 75c. bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

For sale by W. S. Barkwell, city.

WEAKNESS OF MEN

Quickly, Thoroughly, Forever Cured

by a new perfected scientific method that cannot fail unless the case is beyond human aid. You feel improved the first day, feel a benefit every day; soon know yourself a king among men in body, mind and heart. Drains and losses ended. Every obstacle to happy married life removed. Nerve force, will, energy, brain power, when falling or lost, are restored by this treatment. All small and weak portions of the body enlarged and strengthened. Victims of abuses and excesses, reclaim your manhood! Sufferers from fully, overworked, early errors, ill health, regain your vigor! Don't be discouraged in the last stages. Don't be discouraged if quacks have robbed you. Let us show you that medical science and business honor still exist; here go hand in hand. Write for our book with explanations and proofs. Sent sealed, free. Over 2,000 references.
