

The Invalid

Requires nourishment in a concentrated, palatable and easily digestible form. Bovril should therefore form one of the chief items on the diet list of every invalid, as it is the embodiment of all these qualities.

Bovril is not merely a stimulant to prop up the flagging spirits for the passing hour. It is a highly nourishing food, containing all the strength-giving properties of the best lean beef in the most palatable and easily digestible form.

Bovril is Liquid Life.

MRS. EDDY'S LATEST EDICT

Why and When Christian Scientists Should Call a Doctor.

Some Signs of Revolt Among Advanced Members of the Cult.

New York, Nov. 17.—An American special from Boston, Mass., says: There are signs of a revolt among the advanced Christian Scientists over Mrs. Eddy's latest edicts prohibiting healers from trying to cure contagious and infectious diseases. Some of the more prominent healers who decline to follow a matter of present expediency.

Mrs. Eddy refrains from statements. But her personal mouthpiece here, Farlow, upholds her action. To the question how the Christian Science healers can tell if a patient is suffering from a contagious malady, Farlow said that they could tell as readily as a physician or any layman.

"We differ only in our mental recognition," said he, "and it is only in our mental recognition that our treatment applies. In our mental work we deny the reality of the malady, though in its physical aspect we recognize the malady."

"It is proper to call in a physician," he continued, "in a contagious disease, but the healer should keep on praying."

"The action of Mrs. Eddy is not a concession, but simply a bowing to present conditions," he said, "and it is only in our mental recognition that our treatment applies. In our mental work we deny the reality of the malady, though in its physical aspect we recognize the malady."

"The instruction to healers not to care for contagious diseases was issued, doubtless, because of a desire to avoid conflict with the benighted authorities."

Mrs. Eddy's new order is contained in an editorial on Archbishop McEllan in the Christian Science Sentinel, the official organ. Her advice here is: "Mrs. Eddy advises that until the public thought becomes better acquainted with Christian Science, the Christian Scientists should decline to doctor infectious or contagious diseases."

The Germ Theory

For many years the medical profession ridiculed the theory of the germ origin of cancer. Eminent German and French bacteriologists have demonstrated, however, that certain cancers are caused by certain germs or microbes, and there are very few physicians now who do not believe that this is their true origin.

A brochure on this subject, published by A. STOTT & JURY, BOWMANVILLE, ONT., will be sent to anyone interested, on receipt of two stamps, tell all about the germ theory of cancer, and the most successful method of treating this dangerous disease, without the need of resorting to knife or plaster.

A Petrolia dispatch says: The promoter and head official of the Charing Cross oil fields states that tanks at these new oil fields were completely refilled, and that the well is flowing at the rate of 50 barrels per hour.

The Beauty of a Fast Life. Is paid for by brittle condition of body and mind, by exhausted energy, poor digestion, unstrung nerves and a host of other ailments. The beauty of a fast life is the beauty of a healthy body and a clear mind.

Dr. Hamilton's Pills Cure Headache. Two working jewelers, named Gedhill, of Petrolia, and Bug, of Elmhurst, were arrested at Detroit, Michigan, for stealing gold filings and jewelry from their employers and selling the same to dealers in that city. Gedhill's punishment did not appear to be severe, and he was allowed his liberty. Bug was detained for trial.

Cook's Cotton Root Compound. Ladies' Favorite. Is the only safe, reliable, and economical remedy for all the ills of the woman, and is recommended by all the best doctors in the world.

No. 1—For ordinary cases. No. 2—For severe cases. No. 3—For chronic cases. No. 4—For all the ills of the woman, and is recommended by all the best doctors in the world.

Winners, Ont. No. 1 and No. 2 sold in London by C. M. Plam & Co., and Anderson & Nelles, drugists.

GREAT FISSURES IN EARTH AT GUAM ON THE STAND FOR FOUR HOURS

Buildings Wrecked and People Panic-Stricken. Mitchell Examined by Lawyers for Coal Operators.

RESULTS OF EARTHQUAKE SHOCK

Great Damage Caused by Eruption of Santa Maria Volcano—Stromboli's Crater in Activity.

Washington, D.C., Nov. 17.—Commander Seaton Schroeder, naval governor of Guam, has sent to the Navy Department a detailed report of the damage in that island by the earthquake of Sept. 22. The disaster occurred in the daytime, and but one child was killed and a few of the townspeople of Agaña were hurt. There was considerable loss of property, however, and funds are asked for to make the necessary immediate repairs. It is feared that the rented building used as a naval hospital is damaged beyond repair, and the sick are being cared for in a nearby chapel.

The Marine Corps fared worse, and \$10,000 will be needed to repair their property. The public buildings of the island suffered severely from the earthquake, and Commander Schroeder thinks the total cost of repairs on them at least \$250,000. The private loss on the town of Agaña alone is estimated at \$100,000.

The earthquake, which occurred at 24 minutes past 11 a.m., says Commander Schroeder, "was the severest of which there is any record here. It continued for some minutes, and was followed by a series of smaller shocks, leaving a large round pit, and fine cracks were observable everywhere."

A dull grinding roar preceded and accompanied the shaking of the earth, animals were trampled up and fell to their knees, while buildings rocked and swayed, water tanks were tossed over and bells rung by the vibration. In other parts of the island there were one or two small shocks, but no great damage was done.

At the harbor of San Luis d'Apra the collier Justini, anchored in 22 fathoms of water, was severely shaken. The disturbance of the white coral and bottom of the harbor was so great as to give a milky appearance to the sea for some distance around. Some of the vessels in the harbor were damaged, and one of the colliers, the Justini, was damaged.

The massive bell tower of the picture gallery, built in 1898, is cracked with large cracks, and will have to be pulled down at once. Churches and convents are destroyed or rendered uninhabitable.

HEAVY LOSSES IN GUATEMALA. Washington, D.C., Nov. 17.—United States Consul General McVay, at Guatemala City, writing under date of Oct. 31, says in part:

"As a climax to the terrible earthquakes of April 18, which practically compassed the ruin of Quetzaltenango, the volcano Santa Maria, almost adjacent to the city, erupted on Oct. 24. The losses to the owners of the plantations are at this time incalculable, but it is estimated that the coffee loss will reach between 350,000 and 400,000 quintals of 100 pounds the quintal, with the rubber plantations, with buildings, cattle and other accessories, will aggregate \$5,000,000 gold."

Most of the ruins were in the hands of Germans, and the absolute loss of the ruined properties has impoverished the owners, who are now in a state of destitution. Many owners have borrowed money on the present crops, while others have mortgaged their property for foreign banking houses, which carries a measure of misfortune to Europe."

STROMBOLI BUSY. Rome, Nov. 16.—The erupting of the volcano Stromboli is increasing in violence and is accompanied by shocks of volcanic origin and volcanic detonations. Ashes thrown out by the volcano are falling on boats out at sea.

TELEGRAPHIC BRIEFS. Toronto churches are taking up the prohibition campaign vigorously.

The steamship Monterey, with the City of Toronto cargo of 5,000 tons of coal, has been reported at Belle Isle.

By the death of Captain R. L. Sewell, Friday night, Belleville lost one of its best known and most highly respected citizens.

It was C. S. Garland who gave \$25,000 for the seat on the Montreal Stock Exchange. The last seat sold previously brought \$23,000.

Father Reimer, on trial at Winnipeg for the manslaughter of young Wilson, at Lowe farm, was discharged. The jury considered death resulted from natural causes.

A letter has been received by the Canons of the Archdiocese of Montreal from Mgr. Bruchet, who is at present in Rome, stating that he found the Pope more active and stronger than on his last visit to Rome five years ago.

C. B. Heydon, of Saratoga, N. Y., died suddenly at the Rossin House, Toronto, supposed of heart failure. He was about 60 years of age, and had been in poor health, but was about as usual and showed no signs of illness, until 7 o'clock.

James McKinley, an oil borer from Alaska, who shot W. P. Braund two weeks ago at Hamilton, while on a big spree, was on Saturday afternoon taken to jail in \$500 bail.

James McKinley, an oil borer from Alaska, who shot W. P. Braund two weeks ago at Hamilton, while on a big spree, was on Saturday afternoon taken to jail in \$500 bail.

A cablegram was received at Quebec yesterday announcing the death of Mr. Thomas Beckett, which took place at sea while he was on a voyage to South Africa. The deceased gentleman was for many years a partner in the firm of Dobell, Beckett & Co., but retired from living in London, Eng.

Hon. H. F. Crosby, formerly a judge in the international court of Egypt, delivered an address at Toronto on the "Church and the Labor Problem." His address took the line that the church today is busy busy with its own selfish work, and is neglecting the selfish work of individual salvation in a future world, instead of regenerating this one.

At the Hamilton, Ont., police court, the magistrate dismissed the case brought by License Inspector Jarvis against Matthew Ryan, for selling liquor after the legal hour, on Oct. 11. Magistrate Jeffs intimated that he was of the same opinion as Lawyer Heverton for the defense, who said the accused was induced by political feeling and the evidence was insufficient to convict.

Higher Price of Coal Not Miners' Affair—Some of Baer's Statements Denied.

Saratoga, Pa., Nov. 17.—President Mitchell, of the Mine Workers' Union, occupied the witness stand throughout both sessions of the coal strike commission Saturday. For four hours and a half, he took the cross fire of one of the brilliant attacks of the coal companies, and ended the day with few scars as a result of the battle. David Wilcox, of New York, general counsel for the Delaware and Hudson Company, and Wayne MacVeagh, of Philadelphia, who is representing the Pennsylvania Coal Company, and Hillside Coal and Iron Company, were the personal questioners and they put hundreds of questions to Mr. Mitchell, the members of the commission frequently interrupted with questions.

Mr. MacVeagh's cross-examination was, as a rule, very keen. He questioned Mr. Mitchell on the demand for an increase in wages, and pressed the national president hard when he asked him if he cared to carry the responsibility of increasing the living expenses of the miners on the one hand, and the Eastern States who would ultimately have to carry the burden if the demands of the miners for higher wages were not met.

Mr. MacVeagh then took up the demand of the men for trade agreements, which practically means recognition of the union. He asked Mr. Mitchell what sort of a contract he would draw up and the latter replied that he would favor an agreement as outlined in his suggestions to the commission on Friday.

Mr. MacVeagh declared that there was nothing in Mr. Mitchell's suggestions that the companies must give up their right to the coal on the one hand, and the Eastern States who would ultimately have to carry the burden if the demands of the miners for higher wages were not met.

Mr. Mitchell answered that it was, whereupon Mr. MacVeagh asked him if he would endeavor to ascertain and would continue to ascertain what reasons there were for attempting to compel them to give up their coal.

MINERS' CONDITION. After going over the demands of the miners, Mr. MacVeagh took up the conditions existing in and about the mines. He asked Mr. Mitchell to represent, and tried to show that the conditions spoken of by Mr. Mitchell were not borne out by investigation.

He took Forest City, where the mines of the company are situated, as an example, and produced photographs of houses in the town, and also referred to the large deposits of money in the bank, which he said was a prosperous condition of the community.

Mr. Mitchell, although not admitting that the conditions as presented by Mr. MacVeagh were true, he could not not for lack of familiarity with the community, deny his assertions.

The question of an eight-hour day was then taken up. To the direct question of whether the miners of the union, had a right to curtail the hours of employment each day of the miners, Mr. Mitchell said he thought he was bound to say that he was not sure, but he was not sure.

Mr. Wilcox took up one of President Baer's statements, and Mr. Mitchell said that it was susceptible of several interpretations, and he was not sure.

"For instance," he said, "Baer is quoted as saying that state-pickers received 35 cents a day. That may be true in some cases, but we know that most state-pickers get much less than that amount."

All this week will probably be taken up by the presentation of the miners' case. Mr. Mitchell may be on the stand several days.

ANOTHER ANSWER TO THE MINERS. Philadelphia, Nov. 16.—The statement of the Lehigh Coal and Navigation Company, submitted to the anthracite coal strike commission, now in session at Saratoga, Pa., in answer to the demands of the miners, was made public here today. The document states that the company owns and controls about 1,400 acres of coal lands in Carbon and Schuylkill counties, which are estimated to contain over 5,000,000 tons of available unmined coal. Its employees number about 8,000, and the capacity of production is over 200,000 tons a month.

Its capital stock and funded debt amount to upwards of \$20,000,000. All of its capital stock and bonds were issued for full value, but although its important coal lands were purchased at a time when the country was a wilderness and its lands had been acquired at moderate prices, the dividends upon its capital stock to date only average 4.02 per cent.

The profit on coal mined by the company during the ten years ending Dec. 31, 1901, has averaged 11.03 cents per ton, after charging off taxes on coal lands and depreciation, but including any charge for royalty, which represents the value of coal in the ground."

As to miners' pay, for better wages, the document states that in 1901 for a day of ten hours, contract miners earned an average of \$2.00. On the same day, the company's employees received \$1.83; boys, \$1.40; unskilled labor, \$1.25; boys, 77 cents. The average annual earnings of adults were \$15.25. Death is the only antiseptic of the miners that their earnings are insufficient to maintain the American standard of living.

Employees of the Lehigh Coal and Navigation Company, these figures are given: "Out of 14,000 employees, 10,000 are employed in the mines, and 4,000 are employed in the transportation of coal. The company owns and controls about 1,400 acres of coal lands in Carbon and Schuylkill counties, which are estimated to contain over 5,000,000 tons of available unmined coal. Its employees number about 8,000, and the capacity of production is over 200,000 tons a month."

SMALLMAN & INGRAM,

149, 151 and 153 DUNDAS STREET.

may accumulate the larger part of their savings, and return to Europe to live in idleness, but those who have their permanent homes in the region have at least \$10,000 on deposit in the banks, and saving funds in the vicarious savings from the wages earned in the employment of this company."

NEW INDUSTRY AT TORONTO. Toronto, Nov. 17.—A new shipbuilding industry for Toronto has been incorporated with \$1,000,000 capital, called the Canadian Shipbuilding Company, with George A. Cox, William McKenzie, Frederick Nichols, W. R. Brown and W. D. Matthews as provisional directors.

The Hudson Bay Company has been granted a new charter in Ontario. The Hudson Bay Company has been granted a new charter in Ontario. The Hudson Bay Company has been granted a new charter in Ontario.

Proposed to Buy Out the Water Supply Co.—Mooney Bylaw Favored. Stratford, Nov. 17.—The board of trade met on Saturday to consider the report of the Stratford Water Supply Company, a private concern, at \$25,000, and the purchase of the water supply system, and suggested the establishment of a confectionery and biscuit factory here; and the purchase of the water supply system, and suggested the establishment of a confectionery and biscuit factory here.

Mr. Haney Protests. Toronto, Nov. 17.—Mr. J. Haney, railway contractor, Ottawa, is a shareholder in the Canadian Locomotive Company, of Kingston, has issued a writ against the company and Hon. William Hart and Cornelius Dirmigham to have the writ set aside, and a resolution passed by directors on July 1 last, granting a salary of \$16,000 a year to Mr. Hart as president, and \$15,000 a year to Mr. Birmingham as managing director, running from January 1 last.

Mr. Haney also asks a return of any amounts already paid under those resolutions.

Student Roughly Handled. Toronto, Nov. 16.—Herbert Brown, a dental student, while standing on the corner of McCaul and Queen streets last night, was ordered by a policeman to move on. He replied that he was waiting for a car, but declined to state what car. The officer then proceeded to arrest him, and in the melee Brown's shoulder was dislocated. He was arrested, however, and charged with disorderly conduct. He was bailed out and taken to the hospital, and is now at his own rooms.

They Father Consumption. Bad coughs, colds and catarrhs are recognized as the forerunners of consumption, and are more quickly than ordinary remedies, because it is the only antiseptic of the lungs that it is volatile enough to reach the root of the trouble in remote parts of the lungs and bronchial tubes, and impregnate every particle of the air breathed with its healing, germ-killing vapor. Colds can last ten minutes or more, and are cured in ten minutes when Catarrh is inhaled. It cures all throat and chest diseases at once, stopping, headache, and eradicates catarrhs of the nose, throat and lungs. Two months' treatment, \$1; trial size, 5c. Druggists or N. C. Polson & Co., Kingston, Ont.

Dr. Hamilton's Pills are Mild. Lever's Y-Z (Wise Head) Disinfectant Soap Powder is better than other soap powders, as it also acts as a disinfectant.

New Oil Pipe Line. Dutton, Nov. 17.—The pipe line connecting the L. and O. R. tracks at the place is now completed. The distance between the oil wells and Dutton is five miles, and the pipe line is now in operation. There are now five companies operating in this district.

A Brilliant Meteor. Lexington, Ky., Nov. 17.—A meteor of unusual brightness here early Saturday night. The weather bureau reports that it was consumed at an altitude of 300 yards when over the southwestern part of the city. The light produced was intense for several seconds. The meteor was seen by the people of Northwood, Ohio, a suburb of Cincinnati. It passed in a southerly direction, leaving a bright streak in its path.

Kidnapped the Mayor. New York, Nov. 16.—After a thorough discussion of the kidnapping of fourteen leaders of the union cigar-makers' strike committee in Tampa, about a year ago, and the more recent abduction of the mayor of that city because of his alleged sympathy with the strikers, the Central Federation of Labor unanimously decided to lay the matter before President Roosevelt and request him to call for a report from the commission which he some time ago appointed to investigate the matter first mentioned. It was also voted that the question be placed before the National Federation of Labor now in session in New Orleans.

Can Cancer Be Cured? There is a question which is of vital interest to all those afflicted with this terrible disease. Messrs. Stott & Jury, Bowmanville, Ont., have a constitutional remedy which they claim cures cancer in all its stages, and from the number of testimonials they possess from reputable citizens, there seems no doubt that their claim can be substantiated.
