57TH YEAR. NO. 23027

TWO SYSTEMS

OF TIME ARE CAUSING MUCH INCONVENIENCE

Ontario Is Particularly Affected by Different Times.

TIMETABLES UPSET

Saskatoon Still Waiting for Results From Other Places.

Toronto, May 19 .- (Canadian Press) -Analysis of Canada's much-muddled civic time systems reveals many peculia situations. The local option method re daylight saving has produced, through a sort of patchwork process, a veritable crazy quilt of time areas. The result discloses some method in the madness of that irate citizen who vehemently de clared that the Federal Governmen should make it a criminal offence for any city council to interfere with "God's time" by the introduction of daylight

saving ordinances.

The Quebec Legislature, having taken the "time bull by the horns," and made daylight saving a provincial measure, there is in that province general uniformity of time, so far as the big cities are concerned. The cities of Halifax and Sydney, Nova Scotia, are also or daylight-saving time, and St. John and Fredericton, N. B., will adopt it on Sunday next. Apparently, in Quebec and the Maritime Provinces, the daylight savers hold the majority of the cities. When it is noon in Montreal it is 1 p.m. in the maritime cities.

Ontario Times a Puzzle There is the same difference in time under the standard system. It is in the populous province of Ontario where the discrepancies are most awkward, provincially. Kingston and Ottawa have put their clocks ahead an hour. Peter-boro and other Eastern Ontario cities have not. Toronto also has daylight In conformity with Montreal and New York, so have St. Catharines and Niagara Falls, Ont., because of their New York State connections. But the citles of Hamilton, London, Brantford and Windsor and all of a dozen others in Western Ontario, with the exception of Kitchener prefer to stay on standard time, with the result that they are run-ning their clocks one hour behind those of the provincial capital.

The city of Winnipeg having decided to stay with standard time, is now two hours behind Toronto, Montreal and Ottawa. Regina, which is normally one hour behind Winnipeg, is just now on a par with her sister prairie city, having adopted daylight saving time. Calgary and Edmonton, still on standard time, and are now three hours behind the big eastern cities. Saskatoon has apparently been watching which way the jumps," so to speak, and will on June 1 take a vote on whether or not to adopt daylight saving time this summer

Over the Rockies. Going over the Rockies one would naturally expect to find some agreement among the city hall clocks at the Pacific coast. On the contrary, it is 8 a.m. in Vancouver when it is 9 a.m. n Victoria. Vancouver time is four hours behind that of Toronto, Montreal and Ottawa, instead of three hours, as under

the standard system.

The transcontinental railways, which are the most inconvenienced by the variations in time, are running on standard of sun time, throughout Canada. Timetables have been altered in many inin districts which have adopted daylight

One farm wife this morning frankly admitted to a reporter on the market that she "did not know what to do. If cheese was firm in price I could stop making butter," she declared, "and sell our milk to the cheese factory, but it is down, and our milk will not bring us much there. The milk factories have reduced their prices, and a further drop is predicted, so there is no profitable outlet there. I guess we will have to grin and bear it."

Have Same Opinion.

Dear future.

Problem Serious.

That the milk problem is regarded as a serious one is evidenced by the fact that delegations from this district representing milk producers, will wait on the Drury Government in the near future in an effort to have prices adjusted.

District farmers receive \$1.25 per hundredweight of milk from a large wholesale here, which is less than three cents per quart, while it retails at

This opinion was shared by several other wives of farmers who were selling butter on the market today, and one added: "We could feed the milk to the caives, but if everyone starts that calves will come down in price, too. As it is, you cannot get rid of a cow now for more than half that paid a year ago."

Here a horny-handed son of the soit ventured to remark: "I have five cows, which I milk twice a day, spending three hours daily in doing so. For the milk I get nine dollars a week from a London firm, and it is not worth the time, let alone feeding and pasture expenses. If I could do so without a loss,

LOOKS AS IF TRUSTEES NEEDED A TIME CLOCK

That some members of the board of education are not setting very fine example to public school children, whose destinies they aid to shape, is the opinion of a woman school trustee of this city committee meeting of the board was called for 4 p.m. on Tuesday last, and being the only member present on time she criticized fel-low-members for their tardiness. The chairman of the committee was the greatest offender, arriving at the meeting fifteen minutes

"If the school children are a minute late each day they are censured, but the members of the board drop in at any time during a meeting. I am sure these meetings are just as important as school, because the matters discussed pertain to it, and if we, indirectly, as chief guardians of the children, insist that they be punctual, we should at least do so ourselves as an example to

Oitawa, May 19.—Milk retailing at 10 cents a quart, cream at 5 cents a half pint, and the best butter at 30 cents a pound, are almost certain to be the prevailing prices for these dairy products in Ottawa on June 1. Conditions on the cheese market and the excellence of the pastures which make for greater production, are said to be the main factors in the anticipated drop. These new prices will bring the price levels back to 1914 levels. Local producers and dealers are expected to confer some time next week and settle the basis next week and settle the basis of the agreement to replace the present agreement, which ex-pires on May 31.

EARLY CONFERENCE TO SETTLE STRIKE OF COAL MINERS

Lloyd George Will Arrange Meeting When Prospects Are Brighter.

London, May 19.—Canadian Associated Press.—Premier Lloyd George's separate unofficial conversations with the coal owners and miners have led to nothing so far, and even the names of those who interviewed the premier have not been divulged. It is said, however, that progress has been made toward clearing the way for an acknowledged conference between the mine owners and the men. The premier is determined that open negotiations will only be renewed when the way is reasonably clear to a settlement. There is no longer a pretence that the leaders of the miners are unanimously insistent for a national profits pool, but it is equally notable that public opinion remains far notable that public opinion remains fa from whole-heartedly condemning the
