NOT TO BUILD WARSHIPS HERE

Ottawa Government Neglectful of Interests of This Coast in Not Providing for Construction on Pacific

When the tenders were invited for the construction of the warships for Canada's navy the firms contemplatscale ing bids were given a wage based upon rates of wages paid in Eastern Canada with the result that the Pacific Coast was shut out from any possible competition. The B. C. Marine Railway company, associated with a prominent British shipbuilding firm, had prepared to tender, but the Ottawa government's action precluded them from doing so, and the interests of the Pacific Coast have been sacrificed. When the naval policy was decided upon it was announced that it was proposed to construct the vessel in Canada at a cost of 33 1-3 more than it would cost to construct the vessels in England, and it was announced that this would aid the shipbuilding industry, but the aid is all to be given to eastern Canada, where the greater voting strength is located. The Pacific Coast is not to be given an opportunity to compete as was expected for the construction of the vessels for the Pacific squadron. The construction of warships for the Pacific squadron of the Canadian navy at Esquimalt would result in the bringing to this city of at least 4,000 mechanics, and at the usual ratio of three or four persons dependent on each worker, would add from 12,000 to 16,000 to the population of Victoria. The establishment of the necessary shipyards would give a great impetus to the development of the iron resources of Vancouver Island and would be the means of bringing to Victoria's great shipbuilding and repair trade. The tenders submitted have been placed in the hands of the technical officers of the Canadian admiralty, who will probably make their report after September 21 next, and it is an open secret that Messrs. Cammell Laird & Co., of Sheffield, who intend to locate their works at St. John, N.B., are the lowest tenderers for all the vessels to held from the 28th inst to September

Mr. Pugsley's Constituency.

Mr. R. B. Bevis, managing director of the Birkenhead yards of Cammell Laird & Co., when the Canadian Industrial commissioners visited the yards at Sheffield on August 2, said he had strong hopes that the work of building the Canadian naval vessels would be placed with a firm to be established in Canada, which would be assisted, organized and developed by, Cammell Laird & Co. He said:

"In the negotiations which were takpects never were brighter. It will be ing place they had pitched upon St. remarkably fine. One display alone, John, N. B., as the best site for the namely that being installed on behalf shipyards of Canada. It was a big of the Vancouver Island Development venture, and one which one looked forleague, which will occupy the principal ward to with, perhaps, a little avidity. stand in the main hall, promises to be but he hoped that it would materialize. and that Sheffield would benefit by the worth the price of admission. It will

pointed out by the Colonist during the past few years. The following despatch tells of what is held out to St. John, N.B. It reads: "The tenders for the construction of a dry dock and ship-repair plant. a very extensive concrete breakwater, and two wharves from which the first steamships to carry Grand Trunk Pacific freight from the port of St. John will dock, closed on August 10.

Three great British contracting firms submitted tenders, and each deposited half a million dollars as a forfeit. It is expected the contract will be awarded at an early date. These great works involve an expenditure of several million dollars. The works will be located in St. John harbour east."

JEWS IN PALESTINE

LONDON, Aug. 24 .- In a blue book dealing with the conditions and prospects of trade in Syria, Mr. Ernest Weakley, the special commissioner of the Advisory Council to the Board of Trade, gives some details as to Jewish colonies in Palestine.

"The influx of Jews," says Mr. Weakley, "is the noticeable feature in Palestine. They have been steadily coming into the country in increasing numbers since 1882, driven away from Russia and Poland by persecutions, and although measures were taken by the Turkish government in 1887 to prevent the settlement of foreign Jews in Palestine, the restrictions imposed have been ineffective, and have not stemmed the current of immigration. From a total of about 500 Jews resident in Palestine a century ago, their numbers were about 6,000 in Jerusalem in 1861, out of a total town population of 13,000.

"In 1897 it was computed that the population of the city was about 45,000. of which 28,000 alone were Jews. The population in 1900 was about 50,000 the Jewish element then being close upon 30,000, and since then both population and arrivals of Jews have increased rapidly, Jerusalem having today about \$4,000 inhabitants, of whom no less than 55,000 to 60,000 are Jews The Jewish population at Jaffra has also increased, and from about 1,000 souls ten years ago it has risen to about 15,000, out of a total population of 40,000. Large numbers of these refugees are dependent on contributions
