NOVA SCOTIA'S TOURIST TRAVEL

A Comparison of Figures With Other Years

Passenger travel between Yarmouth and Boston for the month of July has just been tabulated and it shows the largest number of people travelling to and from Boston via this port than of any July in the past ten years. The daily service started from Boston on July 1st, and for the month there were twenty six complete trips between the two ports during which 8,103 persons arrived from Boston and 2,609 took passage from Yarmouth for Boston, making a total in and out of 11,712 passengers. For the corresponding month of 1919 only 14 complete trips were made when 7,412 passengers were reported inwards and 2,862 outward, or a total of 10,274 making a difference of 1,438 persons in favor of July, 1920. For the month June last the steamers made fourteen complete trips and brought 3,796 people, while they took away 2,137 or a total 5,933.

For June, 1919, the steamer North Star performed the service for the first two weeks and the Governor Cobb the latter two, making a total of eight trips for that month, during which they landed in Yarmouth 2,465 passengers and took away 1,652, or a total of 4,117, which made a difference in favor of 1920 with fourteen trips per month, of 826 persons. During the past month there was a decided slump in freights as only 637 tons of inward freight were received at Yarmouth from Boston and 930 tons were shipped from this port to Boston. In July 1919, the inward freights totalled 896 tons and the outward 1,938 or practically 1,000 tons more than last month.

A TONIC FOR THE NERVES

The Only Real Nerve Tonic is a Good Supply of Rich, Red Blood

"If people would only attend to their blood, instead of worrying themselves ill," said an eminent nerve specialist, "we doctors would not see our consulting rooms crowded with nervous wrecks. More people suffer from worry than anything else. The sort of thing which the specialist spoke of is the nervous rundown condition caused by over-work and the many anxieties of to-day. Sufferers find themselves tired, low-spirited and unable to keep their minds on anything. Any sudden noise hurts like a blow. They are full of groundless fears, and do not sleep well at night. Headaches and other nerve pains are part of the misery, and it all comes from starved nerves. Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich, red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills make new, rich blood, which strengthens the nerves, improves the appetite, gives new strength and spirits, and makes hitherto despondent people bright and cheerful. If you are at all 'out of sorts' you should begin taking Dr. Williams' Pink Pills. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co. Brockville, Ont.

A GRAY DORT SPECIAL DID THE WORK

The Digby Courier says: "Peanut Marshall certainly did some driving with a Gray Dort Special on Tuesday. Leaving the Myrtle House with two guests who were going to Yarmouth on the Bluenose, he arrived at the station and found that the train had left. His passengers had to be in New York, so he started for Yarmouth, if necessary, but got to Weymouth and was waiting at the station when the Bluenose arrived—twenty one miles in twenty eight minutes. The roads can't be too bad in this county."

TUXIS BOYS AND TRAIL RANGERS
BY FIRELIGHTER
"HOW HIGH OR HOW FAR IS THAT?"

As a real boy you should be able to judge distance from an inch up to a mile or more. You ought, first of all, to know exactly what is the span of your hand, the breadth of your thumb, the length from your elbow to your wrist, the length from one hand to the other with your arms stretched out to either side, and also the length of your feet; if you remember these accurately, they are a great help to you in measuring things.

Judging the distance of objects away from you is gained only by practice, and judging the distance of a journey is generally estimated by seeing how long you have been travelling, and at what rate; that is to say, supposing you walk at the rate of four miles an hour, if you have been walking for an hour and a half, you know that you have done about six miles.

Distance can also be judged by sound; that is, if you see a gun fired in the distance, and you count the number of seconds between the flash and the sound of the explosion reaching you, you will be able to tell how far off you are from the gun. Sound travels at the rate of 365 yards in a second, that is, as many yards as there are days in the year.

A boy must also be able to estimate heights, from a few inches up to three thousand feet or more; that is, he ought to be able to judge the height of a fence, the depth of a ditch, or the height of an embankment of a house, tree, or a tower, of a hill, or of a mountain.

THE SEA MUSSEL INDUSTRY

A novel industry which promises rapid expansion and great popularity is no less than the development of a substitute for the succulent but somewhat costly oyster. This is the sea mussel, found in vast quantities along the low tide mark of the Atlantic coast, chiefly in New Brunswick. The Dominion Government, with the co-operation of scientists, has conducted experiments to this end in Western University laboratories and it is now claimed that mussels can be produced commercially and sold profitably at 15 cents per quart, as compared with the \$1.00 per quart around which oyster prices hover.

The mussel is by no means a new article of diet to the people of Canada, and besides being used extensively in coast towns has found its way to the tables of inland cities in Central Canada. Its delicacy of flavor and high food value have been much advertised since the establishment of government investigation and experiment, and deserve to be much better known. There is yet much to be done in the line of research to ascertain conditions under which production would be most rapid and profitable, and to this end the Council of Industrial and Scientific Research is devoting its efforts.

Children Cry for Fletcher's CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS
