## THE GOOD OLD PLOUGH.

A few evenings since we accepted an invitation from Heichrasons, and attended one of their concerts. were so well pirased with one of their songs, that solicited a copy of the words. It contains truthful timents beautifully expressed —Genesee Farmer.]

Let sing who may of the battle fray, And the deeds that have long since past, Let them chant the praise of the tar whose days Are spent on the ocean wast.

I would render to these all the worship you please, I was I honor them even now;

Bot I'd give far more from mir neart a fail store, To the cause of the Good Old Pinnigh.

Let them land the notes that to move Cust. Through the height and glittering halls While the amorous twell of the hair's bright cari, Round the shoulder of beauty fails.

But dearer to me is the song from the tree. And the rash and hiosomony bough, O, there are the sweets which the rustic greets, As he follows the Good Old Plough,

Fall many there be that we daily see. With a selfish and hollow andr. Whe the plosiman's lot, in his hamble cot. With a scomfor look dende; But I'd rather take a hearty shake From his hand, than to wraith I'd how;

For the honest clasp of his hand's rough grasp, Has stood by the Good Old Plough.

All honor he then to these good old men, When at law they are bowed with toil, Then werfare then o'er, they hattle no more, For they're conquered the sunbern soil; And the chapiet each wears, in his caster hairs And pries shall the victor's brow. With a laurel circuit, to the grave go down, Like the sons of the Good Old Prough.

gs of almost every breed are taught to work by e Greatent. It looks add enough to see these sagaes samals, of all descriptions, from the thick-braded didog, and mild and intringent Newfoundhard down the enable-ing, batt-bound, and enapoish rat-termer employed meteral of lamin away as they do here expopely of the days, however, are of the larger , and a se quar rangency to see their willings to No prima is presumed to one a sheel-barrow an a dog to draw the toad, and in writtens of this we saw loads of wood, mile, butter, cabbages, the moter, brest and his refire, and refrehiment रे रावे सहस्राधी दल कोना का व्यवनार्थ पिन स्वस ह निक ica twop, and the teams had turned around to watch ! a-Henr Journal.

INTERTED HORSE RAKE - Wr. Groupe Whitecomb. Garanch, Funfield county, Commercial has me and and taken encourages to scener a pasent for an I wreness a Borne Rakes. By a coma specification and the cake-heads, ar-And commently to be operated by the direct, the to electric and depress them at proper periods to de to ender aparal discharge the tay while raking it .3 ಸ್ವತಿಕರ್ಗಳ ಆರ

THE INTRODUCTION OF COAL INTO ENGLAND - When this fuel was first introduced into England, the prejudiers ngainst it were so strong that the Commons peution ed the Crown to prohibit the "noxious fuer" A roya A rura: proclamation having failed to abate the growing nusance, a commission was assert to ascertain who burned coal within the city and neighborhood, and to nume-h them by fine for the first offence, and by demobition of their furnaces if they persisted in transgression. A law was at length passed making it a capital offence to burn coal in the city of London, and only permitting it to be London. It took three centuries to effer entirely this prejudice.

Berlin, the capital of Prussia, during the same time 833 persons died persons died. Of the births, 181 are reported as illegiti-mate, and of the illegitimate children 94 died, during the month, facts which carry with them their own solemn comment. In the same month 2,222 persons came into the city to reside, and 1,271 left it, the whole increase of inhabitants is 1,572,

RAT-CATCHERS.—The rat-catchers of the city of Pare have just held a meeting at the Hotel de Ville; their deliberations were presided over by the Impector of Highways, who also exercises juri-diction over the gutters and The object of the meeting was to take measures for the coming rat campaign. A micion and a half of these veriain are supposed as the moment to be undera mag Paris. It was decided that incoming should be the potential used in their extermination. Last year, L. 143,330 rats wire killed and iner talls were deposited in the Hotel de Ville in proof of the fact.

IENS PARENEST —The North British Mail states that

a successful experiment has been made with imp for The bars of imp of which the parement to composed are about three inches broad, and means the same depth. They are laid parsited to, and about one inch apart from each other-the obsect of the last named provision being, we presume, to afford more secure footing to the houses as they pass along the sires. The new instation seems a decided improvement. There is bor compair wely little noise, and the horses appear to find a firm and secure foot-hold

Among the recent inventions, is a ventilating store, intended, we suppose, to enable a fire to blow uself-This may be a convenient arrangement, though it laythe inventor open to the important of blowing ber and cold air at the same time. We presume the proliferion as he a downward draft; for it would be awkward to have a store that would blow up. Perhaps, after all the object is to save the expense of advertisements, enabing the ventiliating apparatos to blow up steelf.

How to Buen Coal .- The art of burning real is not properly understood as it ought to be. much coal is usually placed in the store, by which the draught is destroyed and the gasses are imper-fersly communed. The Miner's Journal, of Postssave there are two errors in the war we burn enal, by which over one-half is wasted. Ist. We have to shut the door of our store or farnace, to make a temporary over-combustion, at one time, and and at another time we have to leave open the door and let in cold air to cool off. 2. The gas that asoends our chimneys carnes off with it a deal of coal that is annumed, merely coal in vapor which gives out little heat for want of air to consume it. lose the most of the unconsumed vapor of east when travellers. All the labor the person behind had to I lose the most of the unconsumed vapor of east when form was to act as severeman, while the dog would the door is shut. When it is open the vapor is consamed, but the heat is reduced by a flood of cold air where the teamsters had become managed and and carried up the chimney. What is required then is an air-tight door over the ash-pit, through which you can let in just what air is necessary for quick or slow combination as desired. The door that admits the real should be tight, and should never be pened except to put real in. A small floo should. admit a stream of air, beated by contact with the store, to mix with the gas on top of the fire. In buying a store, if you find that the store or furnice door ented be left open when you want to moderate your fire, reject it; for it is excentially wrong in its construction, and it will consume three tons of oral where one would answer if the draft door were air-

## A FAIR OFFER.

Doctor Franklin, it is said, once made the following offer to a young man. " Make a full estimate of all you owe and all that is owing to you. As fast as you can collect, pay over to those you owe. If you cannot, renew your note every year, and get the best security you can. Go to business diligently and be industrious; discard all pride; be faithful in your duty to God, be regular and hearty in prayer coal in the city of London, and only permitting it to be used in the forges in the vicinity. Among the records morning and night; attend church and meeting regiment the Tower, Mr. Asile found a document, importing, ularly every Sunday, and do unto all men as you that in the time of Edward I, a man had been true, would they should do unto you. If you are too convicted and executed, for the crime of burning coal in meedy in circumstances to give to the poor; do what, London. It took three centuries to effect entirely this ever else is in your power for them cheerfully, but if you can, help the poor and unfortunate. Parage During the month of September, 580 male, and 503 this course diligently and sincerely for seven years, female, making a total of 1203 children, were born in and if you are not happy, comfortable and independent in your circumstances, come to me and I will pay your debts." Young people try it.

> ECONOMY IN CANDLES .-- If you are without a rushiight and would burn a candle all night, unless you take the following precaution, it is ten to one an ordinary candle will gutter away in an hour or two, sometimes endangering the safety of the house.-This may be avoided by placing as much common salt, tinely powished, as will reach from the tallow to the hotiom of the wick of a partly burnt candle, which if the same by hi, will burn very slowly, vielding sufficient light for a b d chamber; the salt will gra bally sink as the tallow is consumed, the melted tallow bring drawn through the salt and consumed in wick - [Economist.

> A sub-cription of St 10,000, has been raised in the State of O' in, for the purpose of erecting an Agricultural College.

> VESSELS BUILT IN THE UNITED STATES.—From the tables accompanying the S-cretary of the Treasury's Report, we learn that in 1951 there were built in the United States 211 ships, 65 brigs, 532 schooners, 326 stoops, and canal brate, with a total of 298,-202 tonage. Penesilva na owns tonnage amounting to 284,374, being an increase of 25,000 over the previous year. New York has 1,941,013, being an increase of 95,000. Maryland has 304,444, which is an increase of 11,357 Delaware has 11,580, being a decrease of 4,839 North Carolina has 53,722, b ng a decrease of 31,496. Virginia has 59,769, b ng a decrease of 4,497; and the Destrict of Coform as has 22,903, which is an increase of 5,593,-The steam tonings in the United States has increased during the year, 57,700 tons, and now amounts to 5S3,760 tons.

> A design of Sir Joseph Paxton, for the intended Exhimmo of all Nations at New-York, has been on view m Lem lem. The plan is upon a similar principle to that of the Crystal Palace in Hede Park, and the materials are glass, iron and plate. There are two entrances, one at each end, and the construction of the door-way is somewhat standar to that of the transpi entrance to the Exhibition in Hyde Park. The reof is to be of sinte, in order to resist the weight of snow to which it may be posed in the United States. The structure will be mit upon arches, and the galieries will be supported by The design is on the whole remarkable for its simplicity and practicability, and is another perce of eph Parton's great skill in this department of art.

> IT It is a fact that intemperance and ignorance are lovely conveyed with crime Of \$57, prisoners in Auburn State visco, had year, 450 had been habitually in-temperate, and nearly all the rest regular drinkers. In England, of 4,105 courses transported in 1840 only 330

free than one trath, could read.

PATERORIEMET MARKING -On the 2d instant an extraordinary marrier week prace in the ranch of Doosmanne, county Managhan. The tindegroom, Challes M Dermon, in 76 years of age, and the beide is in her 84th year, and as a great grandmether.

France with an army of 600,000 men has 900 Licename, whiles England with 100,000 and, has 2,353. The poor americancy, created by the law of promocrature are the pounded for in the army or nery, and the more imbecile in the State Church. This about law more imbecile in the State Charch. exists nowhere in the world but in Eritain and her Coloares, and in Spain and Portograf.
