GRAIN MOVING TO MARKET.—The rush of prouce to our markets is having its effect on our railways, mmense trains have daily been dispatched from the tations on the Galt road; and special freight trains re constantly running over the road. We may look or a large business the next few weeks. The amount of Wheat that has been brought out of the back ountry within the past week has been something normous. Strings of teams have lived every road seading from the north; and as the sleighing gets eetter, we may look for larger deliveries. In Guelph, in Tuesday, the Advertiser informs us that the "The eams could not actually find standing room on the narket place, and there was no little jamming and houting in consequence. About 15,000 bushels of wheat were sold, and grain of other kinds, and pork in proportion." Should the good sleighing continue, with the present extraordinary high prices, every pushel of grain to dispose of will doubtless be pushed in to the market.—Galt Reporter. GRAIN MOVING TO MARKET,—The rush of pro-

## OBOURG, PETERBORO' AND MARMORA RAIL-WAY AND MINING COMPANY.

THE efforts of our leading men for bringing about a union of the interests of the Cobourg and 1 eterboro' Railway Company and the 1 armora Mining Company, have resulted most satisfactorily. As is already known, the very rich mineral deposits of Marmora and adjoining townships, the comparatively trifling cost of transportation (by way of the Trent, Rice Lake and rail) to Cobourg, and the grest advantages possessed by Cobourg as a shipping point for the ore, had been brought to the notice of parties largely interested in the iron trade on the other side. These men, with characteristic energy, after becoming satisfied by the most thorough tests of the excellent quality of the iron, readily offered to take part in the purchase of the lands and an amalgamation of the interests of the Railway and Mining Companies. The new Company has a capital stock of \$6,000, the whole of which has been subscribed, \$430,000 by American capitalists in Pittaburg, New York and Rochester, and \$130,000 by Edward Burstail, Esq., of Quebec. Thirty thousand dollars, the amount agreed to be paid to the Marmora Company, have been paid. By the arrangements entered into, the town is entirely relieved from any liability on account of the \$100,000 which were required to be paid in order to free the Cobourg and Peterboro' Railway from the claims of the Bondholders, and of which amount \$60,000 in debentures were deposited in the Court of Chancery a year ago. So that when the deed of amalgamation has been filed and the proper notice given in the Canada Gazette, (which is to be done at once) the enterprise will be iairly launched, and we shall have the encouraging prospect of seeing our desires for the return of prospect of seeing our desires for the return of prospect of seeing our desires for the return of the mineral region can be effected, and as the Company, by Act of Parliament, have authority to run branch lines into the townships of Belmont Lake, Madoo, Elzevir and Methuen, all the yield, whether of iron, lead, copper, or marble, will, as a m THE efforts of our leading men for bringing about a union of the interests of the Cobourg and I eter-

up to something handsome, and what is more gratifying still, the trade and the business is likely to increase from year to year.

We have said nothing of the Peterboro' connection as the primary consideration has been to secure the Marmora trade. It, however, has not been lost sight of, and will receive attention in due time. Although power is given in the Act to take up the rails north of the lake, we believe thore is no Intention of doing so. We have heard it stated that a desire was felt by the people of Otonabee and Peterboro' to have the connexion made good across Rice Lake, and that they would be willing to contribute towards that object. Should that be the case, there is no doubt the Company would be prepared to meet their views, and the work on both lines would go on simultaneously. The Marmora business, however, is a certainty, and in a few months we shall see the evidences in the cargoes of ore shipped from our harbor. Other branches of industry are likely to spring up, and already a Company for the erection of smetting works is spoken of. With the great facilities which we possess for procuring iron, and that of the best quality, we imagine few better localities can be found for smelting works, rolling mills, foundries, nail factories, &c., and no doubt we shall see them gradually growing up in our midst, furnishing profitable employment to thousands and making Cobourg one of the busiest and most thriving cities of Canada.—Cobourg Star.
