

When all at Sea

as to the best Boiler Feeder for your plant, pin your faith to:

The Penberthy Automatic Injector.

It can be trusted to give always the same, unvarying, satisfactory service. Its record for handling hotter water starting at the lowest pressure, and working at highest pressure, has made it a favorite with over 350,000 engineers. Follow their example and get the best.

The Penberthy Low Water Alarm

differs from the usual "column" type, and is in every way better and surer. It cannot be stopped by lime or sediment and has been proven by every test absolutely reliable. Best and costs less.

Every engineer should have our catalog ready for instant reference. Write for it to-day.

CORUNDUM FOR POLISHING

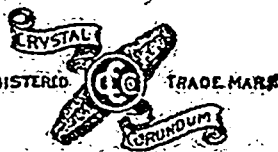

OPINIONS OF USERS:

Factory "G," International Silver Co., Norwich, Conn., says:

"We find it will do just double the work that any emery we ever had would do. Wheels that have lasted us from ten to twelve days with emery are now lasting us from twenty-four to twenty-six with corundum. Besides the saving in time, the work itself is very much more satisfactory."

We are pleased to supply samples for Testing Purposes.

THE CANADA CORUNDUM COMPANY, Limited, TORONTO, CANADA
