BYAM'S

Improved "Common Sense"
SASH BALANCE.
LOCKS AND LIFTS

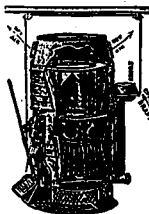

This only practical substitute for
weights invented. The most durable,
the cheapest and best device for all
ordinary windows. Balances when
in position are entirely out of sight. No
nuts, bolts or screws are used in putting
it together so that nothing can get out of
order or need repairing. No cutting,
boring or marking of sash, as the
Balances are let into the jamb. Espe-
cially valuable for repairing old buildings
as they can be put in at a trifling expense,
exactly put in old buildings as new ones.
Sash can be removed from frame in a
moment for cleaning or repairing broken
glass. Can be used where it is impossi-
ble to use weights or other fixtures. No
unsightly cord wearing point off side of
frame. No rattling of sash as pressure
against sash prevents it. No rattling of
weights or pulleys when sash is raised
or lowered. No sticking of weights in
frame. No rods to rust off, wear out
and break. No roller-rollers to become
flattened by standing in one position for
some time. No flimsy coil spring or
delicate mechanism to break, wear out
or get out of order. Its simplicity of
construction and operation is the wonder
of all.

Byam's Automatic Sash Locks (self fastening) and
Sash Lifts or upper and lower sash are the best and
cheapest in the market.

Hot Water and Steam Heating Boilers

My object in presenting this card to the public is to state
that I am prepared to do all work in the above branches to the
entire satisfaction of those whose patronage I may be fortunate
in securing. The universal satisfaction which I have given to
my numerous patrons, with the skilled labor that I employ,
every facility at my command, together with my rapidly in-
creasing trade, gives me confidence in saying that I defy com-
petition. It has been my object in the past and will be my aim in
the future to give satisfaction to all. All plumbing done strictly
in accordance with sanitary principles.
