Gen. Mng'r & Supt.

COPPS' WARRIOR HEATER.

COPP BROS., HAMILTON.

The COPP HEATER has proved itself a marvel of heating capacity. It will heat more space with less fuel than any heating system yet introduced. The cold air passes under the middle ring into the upper section, which has eight horizontal steel tubes, carrying the smoke to the chimney. The cold air coming in contact with these heated surfaces, rapidly rises to the top, and the now intensely heated air can be carried to different rooms. It is quite as effective as a furnace, being built on the same principle, but very much cheaper. It is exceptional in the beauty of its tile and nickel settings, and has unsurpassed heating power. Burns 32-inch wood.
