Winnipeg, MAN
R3H 0P7

Phone: 204-775-8126
Fax: 204-783-1597

Export Contact: Mr. Michael Hoffer, President

Marketing Profile

Washtronics has been active in the fleet vehicle cleaning industry for over 30 years, having completed several hundred installations throughout both North and South America. These have included automated wash systems for transit buses, commodity transportation vehicles and light rail trains, a series of interior cleaning systems, blast dryers as well as water reclamation systems.

The integrity, durability and reliability of their systems is renowned, in fact a recent independent survey of over 1500 fleet maintenance operations indicated that Washtronics is rated #1 in customer satisfaction.

They are proud of this distinction, and through their persistence in the development of advanced technologies and innovative customer support programs they shall continue to purvey products and services of the highest calibre. Towards this end, several research projects have been initiated in response to the challenges facing the industry as they approach the twenty-first century. These include the development of highly advanced control systems which will monitor equipment conditions and efficiency, environmentally conscious systems which reduce energy requirements and improve the recovery of waste-water, a proprietary line of biodegradable chemicals and detergents which are both efficient and considerate to their environment and finally a comprehensive customer support program providing life long support.

All of the aforementioned products are available for export, and Washtronics would be pleased to provide every assistance in your forthcoming project. Their primary language is English and they are functional in French and German, though they will make every effort to communicate in your preferred language.

Products/Services Available for Export:
