

Publications by Professor F.E. Lloyd.

(Jointly with Geo. W. Scarth)

The rôle of Kinoplasm in the Genesis of Vacuoles. Science 65: No.1694, 599-600, 1927.

Further Observations on the Behavior of Gametes during Maturation and Conjugation in Spirogyra. Protoplasma 4: 45-66, pl.1, 1928.

Studies in Periodic Precipitation (with V. Moravek). Plant Physiology 3: 101-130, 1928.

The Contractile Vacuole. Biological Reviews 3: 329-358, Oct.1928.

Colloidal Aspects of Botany. A chapter in "Colloid Chemistry, Theoretical and Applied", New York, 1928.

The Mechanism of the Water-tight Door of the Utricularia Trap. Plant Physiology 4: 87-102 1929.

The Pulsatory Rhythm of the Contractile Vesicle in Paramecium (with J. Beattie). Biological Bulletin 55:, No.6, Dec. 1928.

The Behavior of Vampyrella lateritia, with special reference to the work of Professor Chr. Gobi. Archiv f. Protistenkunde 67: 219-236, 1929.

The Problem of Excretion with especial reference to the Contractile Vacuole. Proc. Internat. Cong. Plant Sciences, Ithaca 1926, 2: 1163-1168, 1929.

Some Uses of the Dark-Field Condenser. Microscope Record, No.20, pp.3-5, May 1930.

The Range of Structural and Functional Variation in the Traps of Utricularia. Flora 125 (2): 1931. (In press)

Utricularia capensis. (In press).

Impressions of Africa. McGill News Supplement No.1: 2-9, Mch.1930. McGill News 2: March 1930.

Further Studies in Periodic Precipitation (with V. Moravek). Journ. of Physical Chemistry (In press)

(With G. W. Scarth) An Elementary Course in General Physiology. Part I. Principles and Theory by G.W. Scarth. Part II. Laboratory Exercises by F.E.Lloyd and G.W.Scarth. John Wiley & Sons, New York, 1930.
