

8. May we further urge that some organized effort, other than that undertaken by the Graduates Society, be made to secure for Undergraduates in Commerce suitable employment during the summer months, as called for in the Calendar.

Employment
During
Summer
Months.

9. For the further progress of the School it appears to us extremely inadvisable that the standard of matriculation for Commerce at McGill be lower---as is now the case---than that required for entering into other Faculties of the University.

Matriculation
Requirements.

NOTES ON PARTICULAR SUBJECTS:

1. ACCOUNTANCY:

We suggest that:

- (1) If it is necessary to divide a class into two or more sections, all sections receive instruction in any given portion of the subject from the same instructor. Furthermore, if, in the same class, the same subject be lectured on by two or more professors, a dividing line be made to separate the work to be dealt with by each.
- (2) There should be four hours a week devoted to this subject in each of the first two years.
- (3) Laboratory work should be part of the course throughout. Third Year men might act as Demonstrators.
- (4) The projected plan of bringing in complete sets of books for the information of students should be included under (3).

NOTE:

It is utterly impossible to visualize systems of accounts and sets of books without having seen and studied them. We submit that laboratory work in accounting is an essential adjunct to the course.

2. ECONOMICS:

The study of Economics is of prime importance to Commercial students. We would suggest that it be made an obligatory subject in all three years with a minimum course of two hours a week. It should include not only the principles of economics but also
