Teste on Diseases of Children.

A Homeopathic Treatise on the Diseases of Children. By Alpn. Teste, Doctor in Medicine, Member of several learned Societies, etc. Translated from the French, by EMMA H. Cotte. One volume, 12mo., r uslin. Price, \$1 25.

It is the only treatise on the Homeopathic plan expressly devoted to the diseases of children. With great completeness of detail, it describes the principal diseases to which that age is subject, together with their appropriate remedies. As a unanual of domestic practice, it must be welcome to the receivers of Hahnemann's system.—N. Y. Tribune.

This is an excellent work. On O It is distinguished by clearness of statement, practicalness of direction, and by originality of observation. What readers it particularly valuable to families is the simplicity of its directions, obviating the doubt and uncertainty which attend the attempt to administer medicines according to most Homeopathic works.—Cleveland Leader.

Croserio's Obstetrics.

A Homeopathic Manual of Obstetrics: or a Treatise on the Aid the Art of Midwifery may derive from Homeopathy. By Dr. C. Croserio, Midecin De l'Embassade De Sardaigne, Membre De La Societé Hahnemannienne De Paris, etc., etc. Translated from the French, by M. Cote, M. D. Second Edition. One volume, 12mo., muslin. Price, 75 cents.

It is only necessary to have it known that Dr. Croserio is the author of the above work, to induce each practitioner of our school to seek a copy of it without delay. It is one of those few practical works which will aid practitioners at the bedside of the sick.

The volume may seem insignificant, because it contains only 153 pages; but our realers can hardly conceive of the amount of information which the author has contrived, in the clearest manner, to express in a few words.

The practice is purely Homeopathic.—Am. 'our. of Hom.

Shows what Homeopathy has done, and can do. We take pleasure in recommending it to Homeopathists.—North West. Journal of Hom.

Having read the original, we can prenounce this a good translation. O o o o We think it a very excellent work; such a book as has long been needed in Homeopathic practice, one manifesting in itself a great deal of close and patient study and research.—Philadelphia Journal of Hom.

Rapou on Fever.

Typhoid Fever and its Homeopathic Treatment. By Aug. Ravov, Docteur en Medeeine De Faculte De Paris. Translated by M. Cove, M. D. One volume, 12mo., muslin. Price, 50 cents.

The original work, of which this volume is a translation, is understood by the students of Homeopathy to be one of the most valuable treatises on the subject that exists in medical literature. It contains many original and striking views on the characteristics of fever in general, while its practical directions in regard to the specific disease of which it treats, can not fail to suggest important hints to the intelligent practitioner of every school. An interesting feature of this volume is a spirited discussion of the use of blood-letting, and of water in the cure of typheid fever. The translation, which is from the pen of an eminent Homeopathic physician in Pittsburg, presents the views of the writer in neat and compact English. In the prevailing uncertainty of the profession with regard to the fatal scourge, to which this work is devoted, its lucid reasonings, must provo acceptable to a wide circle of medical readers.—New York Tribune.
