Dr. Agnew's Catarrhal Powder

whose mission it is and which mission it fills in freeing thousands from the bondage of dreaded, disgusting, discouraging, distracting catarrh, that cruel, relentless master that the is no respecter of persons. How do you know you are in its thrall? Note the symptoms—headache, watery eyes, pains over the eyes, deafness, buzzing in the head, symptoms—headache, watery eyes, pains over the eyes, deafness, buzzing in the head, symptoms are forerunners of catarrh, and catarrh in the headache stage can be relieved symptoms are forerunners of catarrh, and catarrh in the headache stage can be relieved in 10 minutes by Dr. Agnew's Catarrhal Powder and the sufferer may be saved the suffering that comes with the chronic stage and the distress and maybe fatal results when catarrh takes hold on the lung tissues.

Take catarrh in time with this wonderful cure, which, as thousands have said and thousands more could say, "works like magic," and you will have struck the chord that is the keynote to health and happiness.

ALL DRUGGISTS AND MEDICINE DEALERS SELL IT. DR. AGNEW'S CURE FOR THE HEART gives relief in thirty minutes. DR. AGNEW'S OINTMENT relieves eczema, scrofula and all skin eruptions with first application - 35 cents

Down From the Yukon.

Dick Wells, an old 49er, came into camp the other day for the first time. Mr. Wells has just returned from the Yukon and is now a resident in Toronto, but his people live in Aurora. He has the worst type of "Cobaltitis." He went out to the Gilpin-Cobalt in Bucke, bought a block of stock on the spot and tried to buy an adjoining property. He thinks well of the Gilpin.

Down at Portage Bay, where Druggist Moore of Cobalt and Tom Hare of Toronto have been working part lot 15, in the 6th concession of Coleman, they have found a well-defined vein, have traced it for 30 feet and have found the silver. Last Friday was Lucky Friday in the camp, as several new discoveries were made that day. This property has been worked for months, but the present owners have only been at work two

of Coleman keeps up its present record in the road-making line.

Discovery.

At the O'Brien mine the other day Professor Hidden, the New York expert, who has been in the camp for two weeks, made an interesting discovery when he picked out "Polybasite," which is not only new to Cobalt. but to Canada. It is associated with argentite (sulphide of silver), native silver, smaltite (di-arsenide of cobalt), and chalcopyrite (sulphide of copper and iron). It is found in the pink and white calcite veins, and is a compound of sulphur, antimony, copper, iron, zinc and silver, and when pure contains seventy-five percent. Silver.

At the Nipissing a more interesting discovery when he picked out "Polybasite," which is not only new to Cobalt. but to Canada. It is associated with argentite (sulphide of cobalt), and chalcopyrite (sulphide of copper and iron). It is found in the pink and white calcite veins, and is a compound of sulphur, antimony, copper, iron, zinc and silver, and when pure contains seventy-five percent. Silver.

At the Nipissing a more interesting discovery when he picked out "Polybasite," which is not only new to Cobalt. but to Canada. It is associated with argentite (sulphide of cobalt), and chalcopyrite (sulphide of cobalt), and the street commissioners are having the unsightly dump removed the stores and offices are being related and the promoters deserve great aprise for their enterprise in having put it of attractions is promised

discovery was made by the professor, when he found a pink mineral occurring as an encrustation, known to experts as a silicate or carbonate of cobalt, which has hitherto been unknown in North America. This was discovered in a cavity of Cobalt Silver, assaying over 8000 ounces to the ton, and was found at a point 94 feet northerly from the prolific vein on the Nipissing property numbered 26.

Evelyn Baldwin, the celebrated Arctic explorer, has also been in this country for the past three months, and left this week for the east to fill some Chautauqua engagements. He

IE PROGRESS OF CUBA

BARTLE, CUBA, RAIL WAY STATION.

The above is reproduced from a photo taken July 4th, 'of of the station now being built by

Sir William VanHorne at Bartle, Cuba

Bartle Station is being constructed of cement blocks with a projecting roof of imported French tiles; is 62 feet long by 32 feet wide, with a platform 350 feet long, and will be the finest station along the whole line of the Cuba Railroad.

This station is located in the centre of the

Town of Bartle, Eastern Cuba

with regular passenger and freight trains and mail delivery twice daily.

Dui can O. Bull, General Manager of the Cuban Realty Co., Temple Building, Toronto, when asked how he had secured for his Canadian Town this important advantage, said 'twas simply one of the many evidences that railroad efficials and people of Cuba generally recognize the fact that Bartle offers the best inducements of all Cuban Towns and Colonies, not only on account of the quality of soil and all the conveniences of the location, but also owing to Bartle's great advancement and development.

Railroads usually size up correctly the possibilities for the future of the different localities of any country, and we advise people, who contemplate a Cuban investment to see Duncan O. Bull about Bartle before investing elsewhere, because the Cuba Railroad must reckon that

Bartle's Climate and Soil and Location

will attract people and will produce oranges and other fruit, sugar, poultry, regetables, etc., to be hanled to market, sufficiently to warrant this fine station; also that Bartle is there
