THE ENLARGED MARKET.

If the Market Improvement Association ever expect to make a success of their project they must remove the existing suspicion that the scheme principally designed to boom property in the vicinity of St. Lawrence Market. They must present the project as one that will benefit the whole city and not the East End alone. In order to get the movement on a proper basis the committee that has been appointed should be reconstructed so as to include two or more representative business men and one alderman from each ward. The fact that the proposed new market will increase the value of the city's property s only an incidental advantage. The benefit that will be conferred on citizens generally is the great argument in favor of the project. What is wanted in Toronto is a market conducted on some such lines as characterize the big de-
