

WILL BE NO GENERAL STRIKE

Miners' Union Provide for a Fund to Aid the Striking Anthracite Men.

APPEAL TO AMERICAN PEOPLE

Unions Have One Million Dollars, One-Half of Which May Be Devoted to the Fund.

Indianapolis, Ind., July 19.—At 1 o'clock this afternoon the convention of United Mine Workers adjourned, after declaring against a general strike, providing for the raising of a fund with which to aid the striking anthracite miners and issuing an appeal to the American people for support.

1.—That the National Secretary, Treasurer of the United Mine Workers be authorized to appropriate \$50,000 from the funds of the national treasury for the benefit of the anthracite districts 1, 7 and 9 (those are the anthracite districts).

2.—That all districts and sub-districts and local unions be asked to donate whatever they can afford for the support of the strike.

3.—That an assessment of 10 per cent be levied on the earnings of members of the districts Nos. 1, 7, 9, 13, 15, 16, 20 and 21. This assessment is not to be made against members of unions now on strike, but in such cases the assessment is to commence when the strikes are over, the manner of this being arranged by the unions.

4.—That the assessments be paid direct by the local union to Secretary-Treasurer Wilson.

5.—That 25 per cent be deducted from the salaries of all national district officers and organizers.

6.—That all contributions made by the national organization be distributed pro rata to the anthracite districts in the ratio shown by the last coal reports.

7.—That each local union be requested to aid, as far as possible, in securing work for men now on strike.

8.—That an address be submitted to the American people. After the recommendations and address had been unanimously adopted, the miners of Illinois announced that they have appropriated \$50,000 from their treasury for the support of the anthracite strikers. Ohio gave \$10,000 and Iowa and Indiana promised contributions to be made later.

President Mitchell declared that there was approximately one million dollars in the treasuries of the various local unions and that his construction of the clause directing the union to contribute "what they could afford" was one-half of this money.

Immediately after the adjournment President Mitchell called the meeting to order again to hear a belated report from a committee appointed early in the week to prepare resolutions on the recent mine disasters in Pennsylvania and Utah, and the matter went over for investigation, and the convention adjourned for the second time.

At Hamilton's Point. In spite of the dull and threatening weather, large crowds were in attendance at Hamilton's Point yesterday afternoon and evening, and listened to a fine program of music rendered by the 65th Regiment Band of Buffalo. For this week the management have decided to return to vaudeville, and one of the most expensive and up-to-date shows has been secured, the opening performance of which will be given tonight at 8:30, and continue each afternoon and evening the balance of the week.

The program includes "The Boystons" a comedy singing, dancing and juggling; Frank and Ida Williams, high-class entertainers; W. A. and Lottie Bohmer, German comedians and vocalists; the Two Girards, acrobatic sketch team, and the Lemon Lemon circus Queen, all of whom are new to the Toronto public.

A Delicious Aroma. Grand old cigars have a peculiar flavor and aroma of their own that makes them immensely popular with all lovers of cigars. They cost no more than ordinary kinds.

Blue Serge Suits.

—Share honors for summer with flannel ones. But there is double danger in serge—a mean puckering at seams and a losing of color.

Why not buy serge suits you can rely on—Semi-ready for instance? By so doing you are insured against loss or dissatisfaction from any and all causes. \$12, \$15, \$18 and \$20.

No other serge suits win friends so fast and keep them so long. Scientifically graded sizes for all figures.

Semi-ready

Sole Toronto Agency—22 King St. W.

PREFER AN AMERICAN.

Vatican Approached an Appointment of Delegate to Philippines.

Rome, July 19.—Interest in the Philippines question now centres in the appointment of an apostolic delegate to Manila, as it is considered that the selection will be an indication of the real intentions of the Holy See.

Governor Tait has unofficially intimated to the Vatican that the appointment of an American prelate would be preferred, and mentioned the name of the Right Rev. George Montgomery, Bishop of the Diocese of Monterey and Los Angeles. It is thought to be impossible to select Bishop Thomas O'Gorman of Sioux Falls, S.D., because of his participation in the strike here. Doubt, however, is expressed about the Vatican appointing an American, as the opinion is expressed in political circles that an entirely independent delegate is required to properly deal with the questions at issue.

SCRAP IRON EVIL.

Grantham Township Case Discussed by Hon. J. M. Gibson's Partner.

Hamilton, July 19.—Hon. J. M. Gibson has not returned from Europe yet, and his partner, W. W. Osborne, was asked about the matter of the "aggravation of the scrap iron evil" complained of by The World, in an article on the Cataract Power Company's assessment in Grantham Township. The interpretation given by the court to the act was just what the legislature has intended, he said, to do. The trouble, he said, was this: When a company or corporation got anything like fair treatment in the matter of assessment, the World and some other papers at once began to cry that the municipality was robbed. The idea of the government in the assessment matter was to try to get back to the conditions which prevailed some years ago, when the assessment was more equitable than at present.

FATAL HEAD-ON COLLISION.

Newcastle, Pa., July 19.—One man was killed and seven badly injured in a head-on collision that occurred tonight at East Brook, four miles north of this city, on the Western New York and Pennsylvania Division of the Pennsylvania lines, when southbound passenger train No. 216, from Oil City, crashed into northbound train No. 10, headed by Edward Murphy of Mahonington, engineer of the northbound train, crushed between the tender and cab of his engine, mangled and leaves a family.

Postponed for a Week.

Owing to the wet weather on Saturday the Electric Workers at Island Park was postponed for a week.

DOVER A PORT OF CALL

Morgan's Frequent Visits There to Test Its Capabilities.

London, July 20.—The Paris correspondent of The Sunday Observer says that in engineering circles of Paris it is reported that the frequent visits recently paid to Dover by J. Pierpont Morgan were made with the object of testing the capabilities of the new harbor improvements, with a view to the Atlantic shipping combine lines. The correspondent adds: "During the interview between Mr. Morgan and Emperor William this subject I hear, was touched upon and the proposed change received the Emperor's full approval, so far as the terminal lines are concerned."

ALL OVER CHICKENS.

Roanoke, Va., July 19.—A special from Abingdon, Washington County, Virginia, says Moses Lyton and John Collins, two prominent farmers living on adjoining plantations, near Saltville, became involved in a fight because the former had killed a pig here, Chelch Be. He states that Collins was driving past Lyton's home when Lyton fired upon him with a double barreled shot gun and killed him. However, before he died, Collins drew a revolver and fired five times at Lyton. Twenty-five men had to guard Lyton's home last night to keep him from being lynched. Bad blood is manifest and more trouble is looked for. Lyton is in the county jail at Abingdon.

WATCHING THE ANARCHISTS.

Washington, July 19.—An evidence of how closely the governments of the world are working together to run down anarchists is shown in a communication received at the State Department from the Turkish minister here, Chelch Be. He states that Dignot Genouli Gussip and Pasquale and Cassia Carmelo, three anarchists, have been expelled from Constantinople, and he desires to be informed if they take refuge here, and especially if they should leave the United States to return their destination.

WILL VISIT U.S. IN 1903.

London, July 20.—The Sunday Times this morning says that Thomas F. Walsh of Washington, D.C., and Mrs. Walsh were lately guests of King Leopold of Belgium, at Ostend, and that King Leopold promised to pay Mr. and Mrs. Walsh a visit in 1903 at their home in the American capital.

RUBBER TREES IN NEW GUINEA.

Melbourne, Victoria, July 19.—In view of the shortage of the rubber supply in Java, a discovery of rubber is made of an important discovery of India rubber and gutta percha trees in German New Guinea.

CHATS AROUND THE WHEELS

Canadian Northwest is an Oil Storehouse Capable of Supplying the Whole Continent.

TORONTO MAY HAVE NEW FACTORY

Shipowner Can't Speak Favorably of Fast Line Between Canadian and European Ports.

Dr. Marion S. Churchill of Vancouver, B.C., is a Queen's Hotel guest. He is one of the best-known chemists on the Pacific Coast, and is renowned as an expert on fuel oils, operating their various qualities as heat generators. Dr. Churchill has just returned from the oil fields of Southern Texas, where he made an exhaustive investigation of the qualities of the Beaumont oil gushers. He will return to the Northwest via the Canadian line. He is an enthusiastic advocate of the use of oil as fuel, and thinks it is soon to replace coal among the great commercial nations.

"Canada will be a great factor as an oil-producing country within the next few years," observed Dr. Churchill to a reporter yesterday. "The fact is generally known, except through commercial circles, that the Canadian Northwest is a great oil storehouse, capable of supplying the whole continent with fuel for the life of several generations, but this is not generally known. Of all wells of the Southern Pacific coast line of the United States have been situated in several years ago, but the line has not been followed further north to any considerable extent. I know, however, that the vein of oil which has been discovered in the Pacific and along in California to the Pacific coast extends into the Canadian territory, which, in my opinion, is the real source of all the great oil supply of the United States."

"I have lived in the Canadian Northwest for the past 30 years, and I have fully studied the oil question in that time, and I am convinced that the supply east of Vancouver, I am convinced that the great basin between the two chains of mountains, the Sierra chain and the Rockies, contains a lake of oil of incalculable quantities on this territory. This space is in practically all of British Columbia, as it is bounded by the Rocky Mountains on the extreme western border of Alberta the oil field makes its first appearance, and the oil continues to flow through the fish Columbia, the oil is produced by these two ranges. On the extreme western border of Alberta the oil field makes its first appearance, and the oil continues to flow through the fish Columbia, the oil is produced by these two ranges. On the extreme western border of Alberta the oil field makes its first appearance, and the oil continues to flow through the fish Columbia, the oil is produced by these two ranges."

Editor Black of Cincinnati, who publishes The Journal, the official organ of the Democratic party, is one of the best informed men in the organization. At his hotel yesterday he paid President Fox a neat compliment in his peculiar way. "Will Mr. Fox be a candidate for re-election? Well, now you are asking a hard question. To show you just how secretive a man the president of the Iron Molders of North America is, I will say that, while I have been in his office for the past five years, and almost constantly with him, and I believe, very close to him, he has never uttered in my presence a word that would indicate his plans on this subject. He is business, simply business, the most genial of men."

Thomas M. Rogers is a Chicago broker rusticated in this section for the moment. He is registered at the Palmer House. Speaking of speculation, he observed: "I never saw such a market as this one. It is a buying market. All classes of securities are steadily rising. There are immense sums invested speculatively at present, and if Pierpont Morgan, Gates or other great factors in the financial and industrial world should drop their money it would mean infinite ruin for many big houses because of short margins. This is the shadow of the speculative world, the spectre that disturbs every short and every man who holds large lines of securities. This is the speculative danger."

Mr. Compton Fox of Manchester is a Grand Central guest. He is in Toronto to install an agricultural implement display at Toronto's Exhibition. Mr. Power is a great admirer of Canada and especially Toronto. On this subject he says: "Of course, any European manufacturer of agricultural machinery who has a factory in Toronto in time, and thus supply the vast trade from the Northwest Territories. I predict that the demand from that section for all kinds of agricultural implements in the next two or three years will be so large in excess of the supply that agriculture will be retarded thru that part of Canada because of the absence of the proper tools. We can recall the great impetus in the States twenty years ago, when the men who made fortunes out of windmills, and very poor windmills at that. There must be a great many mills for the Northwest, and the best of them, but common plows, harrows, barrows, wagons, corn planters and harvesting machines will have to be supplied in vast quantities. Our house hopes to get its share of this trade, and I predict that the Toronto houses will supply the big majority of this business. The houses here are managed by alert men, and they know how to put a good article on the market cheap. Toronto has a name in the industrial circles of Europe that would surprise some people of this city."

STRYCHNINE IN BRANDY.

Atlantic City, N.J., July 19.—Thomas Ormrod, manager of Clabbe's Hotel, is dead, and Nathan Leekan, a merchant, died here last night. It is thought to be strychnine poisoning. The men went into a bottling establishment and took a drink of brandy. Ormrod immediately became ill and died a short time later, in convulsions. Leekan was also seized with convulsions, and the physician here had little hope of saving his life. It is believed that some person put strychnine into the brandy, and analysis is now being made.

NEGROES SHOT TO DEATH.

Kosciusko, Miss., July 19.—Two negroes, Monroe Hallman and James Gaston, were shot to death at Crossroads, 13 miles west of Kosciusko, by a mob. The trouble arose from the organization of secret societies of negroes, with the intention, it is said, of including the negroes to violence against the whites.

Special Excursion to California Over the Wabash.

At less than the one way first-class fare, tickets on sale July 25th and August 1st to 9th, inclusive, good to return until September 30th, 1902. Good going and returning via all direct routes. On August 1st to 14th, round trip tickets will be sold at single fare, to Denver, Colorado Springs, Pueblo, Glenwood Springs, Ogden and Salt Lake City, Utah, good until October 31st, 1902. The Wabash is the short and true route to the above points. Fine equipped passenger trains in America. Full particulars from any R. Agent, J. J. Richardson, District Passenger Agent, northeast corner King and Yonge-streets, Toronto.

ONE KILLED, ONE INJURED.

Hudson, N.Y., July 19.—An extra car on the Albany and Hudson Railroad at Stockport, this evening killed one child and mortally wounded a young girl named Stolliker, both residents of Stockport Centre.

CHARGE OF CONSTRUCTION.

Montreal, July 20.—Mr. T. G. Holt, who has an interest in Mackenzie & Co., has been charged with the construction of the bridge over the St. Lawrence River. The charge is that he has been guilty of fraud in the construction of the bridge.

Piles.

To prove to you that Dr. Chase's Ointment is a certain and absolute cure for every form of itching, bleeding and protruding piles, the manufacturers have guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get money back if it does not cure you. Write to the manufacturers or EDMANSON, BATES & CO., Toronto.

White Rock Lithia Water

is pronounced to be the most perfect table water of modern times.

1st—It is the only water containing Oxygen gas, which instantly relieves that feeling of distress caused by over indulgence of the appetite or by bad digestion.

2nd—The Lithia contained in the White Rock creates a splendid effect on the kidneys.

3rd—White Rock Lithia Water mixes with every liquor, from milk to champagne. Can be procured at first-class clubs, restaurants and grocers, and also at Messrs.

ALL IMITATIONS MUST HAVE AN ORIGINAL.

HUDSON'S DRY SOAP is the original powdered soap.

It was in its infancy before modern washing powders were ever heard of.

For sixty years it has been in constant use in Great Britain, and is well and favorably known throughout this country.

It is in every way, shape and form by three generations of housewives.

Age alone does not necessarily imply merit, yet no article could stand daily trials for considerably longer than HUDSON'S DRY SOAP if it was not of the highest quality.

Simple, economical and inexpensive.

Public Confidence Established.

The confidence of the public becomes established in an article when its producers keep faith in giving them always the best that skill and money can produce.

This has been the case with the T. B. Company's Ales and Stouts, which are pronounced by competent critics and connoisseurs to be "the best in the world."

You will say so too after using them.

At All Dealers.

Toronto Brewing Co.
