SENATOR FISET DEAD
Aged Quebec Statesman Dies in His 75th Year.

Quebec, Jan. 6.—Senator J. J. Fiset, of Rimouski, died at that place yesterday at the advanced age of 74 years and 11 months. He was one of the oldest Liberal senators of Quebec province. The funeral will be held at Rimouski on Monday.

Quebec, Jan. 6.—A batch of close to 200 officers and men, invalided home after taking part in the battles on the French front, arrived here yesterday evening, and are at the discharge depot, undergoing examination before they are sent home to various centres of the country. The lot comprises eleven Quebec City men, a number from various towns in the province, over thirty from Montreal, and over a hundred from Ontario.

The list is not yet classified, but is expected to be delivered to the press some time Sunday night or early Monday morning.

BERLIN JOYFUL OVER RUMANIA'S OILFIELDS
Dispatches Say Production Will Resume Within Few Weeks.

London, Jan. 6.—A Reuters' dispatch from Amsterdam quotes Berlin dispatches as saying that the work of repairing the damage in the Rumanian oil districts has advanced so far that some works may resume production within a few weeks. About two thousand carloads of petroleum are said to have been captured at Constanta. The standard refinery at Ploesti is ready to resume work at once, it is said, and the oil wells at Campina will be producing again in about a week.

Pacific Coast Scientists Claim to Have Discovered Secret.

Berkeley, Cal., Jan. 6.—Scientists at the University of California have discovered the substances that produce growth in the human body. It has been announced today. Tetelin is what they call it. It is located in the pituitary body at the base of the brain, and by retarding or accelerating its functions it may be possible, according to the Berkeley scientists, to control the stature of human beings.

Announcement of the discovery was made by Dr. T. B. Robertson, professor of biochemistry, who said that he had succeeded in isolating tetelin and that he believed it was the first time in the history of biological science that it had been done.

Dr. Robertson said his experiments had covered a period of four years, and that the ultimate importance of the discoveries made by him and his associates could not be estimated at this time.

Another Big Detachment of Invalids at Discharge Depot.
