

BOY SKATES INTO HIGH LIFE OF NEW YORK

**Falls Through Ice Into Park
Lake and Gets Three Baths
in One Day -- Is a Hero in
Plaza.**

New York, Jan. 7.—When little Eddie Murphy, of East Sixty-second street, got a pair of pot metal skates for Christmas, he did not have the least idea that they were going to be the means of his literally "falling" into a chapter of high life—with luxurious appointments and liveried attendants. And for that matter he probably does not relish his advent into fashionable quarters and indeed would have been happy if only the skates had filled their mission that of affording the long stroke glides over an ice surface with companions on "your" choice.

As it was he ran the gauntlet of the extremes in baths. Together with his chum he was aimlessly skating about the lake in the lake in Central Park, near the Fifth avenue entrance yesterday afternoon and with the aid of the true young American spirit he flurried about the ice. Just as he often did, he plunged into the icy water when the "rubber" ice gave way. His companion ran out of the park shouting at the top of his lungs and chaunting at the top of his lungs and chaunting at the top of his lungs. He flurried hurried to the lake arriving there just in time to rescue the boy from drowning.

From the children's store of the lake he was taken to the solicitation of women who ran out of the Hotel Plaza after witnessing the rescue. He was taken to the hotel and stripped of his scant and was read in fairy stories and seen on show posters the many beautiful things in reality which surrounded him as he was taken to the first-class bath of the Plaza. He and latter given a steam bath and latter given an electric bath with "all the trimmings."

Three baths on the same day is recorded in 1924. It is probably a record on foot, and it will probably take some time for him to live down with his companions on the slide—even if he is not from the side with whole, his hair scented with sweet odors and his whole body rubbed with a soothing ointment. Evidently he escaped from the hotel. He identified himself as little Murphy, of the sixty-second street, that is, "rough."

Frozen to Death. Kingston, Ont., Jan. 7.—A despatch from Flinton, near here, says that Lessorad who escaped from the house, was held pending his arraignment for assaulting his brother's wife, believed to have been frozen to death. Lessorad got away with only his clothing on. Constables tried to find him for some time, but the cold weather forced them to quit.

~~~~~

ly words. From early morning late at night I watched the Jam work. He is the inspiring spirit—the driving force in his little kingdom. He lives and works for his subjects and he is able to convince by such facts the prosperity of his count

A political cartoon by Gruë. In the foreground, a man in a suit dumps a large wooden barrel labeled 'UNGEARED' into a trough. The trough is filled with coins and is being eaten by several farm animals. A cow is labeled 'BEEF', a pig is labeled 'PORK', a sheep is labeled 'WOOL', a chicken is labeled 'EGGS', and a butter churn is labeled 'BUTTER'. In the background, a woman in a kitchen apron kneads 'BREAD' on a rolling pin. A man in a suit stands in the background, looking at the scene, with a speech bubble that says 'ISN'T IT PIERCE BILLY?'. The cartoon is signed 'GRUE' in the bottom right corner.

# HOWLERS OF THE ENGLISH SCHOOLBOY

**DALHOUSIE.**

Dalhousie, Jan. 7. — The public school opened Monday with a good attendance. L. D. Jones, principal; Miss Sadie McAffrey, intermediate; Miss Lena Miller, junior; Miss Emma Harquall, primary.

The Restigouche river closed over last night and smelt fishing will begin in a few days, if the weather keeps open.

Elsie Mitchell, a student at the Provincial Normal School, left this morning to resume her studies there.

Alban Bates leaves tonight for Deseronto, P. Q., where he has charge of the public school.

Capt. Charles Powell returned last week from Ottawa where he has been on a business trip.

The many friends of Miss Florine Doherty will be pleased to hear that she has quite recovered from her recent severe illness.

Jas. Pigeon left yesterday for Amherst, where he is connected with the Robb Engineering Co.

The Dalhousie Lumber Co.'s shingle mill will run the entire winter. This is a departure from the rule with Dalhousie mills, and this is possible since the International railway has been opened up—the cedar is shipped here by rail from the limits.

New York, Jan. 7.—After looking into the qualifications of several hundred clergymen in three countries, the Fifth Avenue Presbyterian church, at Fifth street, last night unanimously called to its pastorate the Rev. John Henry Jowett, M.A., pastor of Carr's Lane Congregational chapel, Birmingham, England.

In all likelihood Mr. Jowett will accept, as he wrote in answer to queries that he had a divine premonition that the Lord meant him to make a change.

After the meeting a cablegram was sent to Mr. Edwin J. Gillies, Mr. Frederick A. Weddell and Mr. Charles Wheeler Barnes, who are now in England and who will notify Mr. Jowett that he has been called to New York.

The formal call, which was drawn up and presented last night, will go by mail.

The Fifth Avenue call carries with it a salary of \$12,000 and a residence.

It was also voted to pay Mr. Jowett nothing more to this church.

The Rev. Dr. Geo. Alexander presided at the meeting, and the senior elder, Mr. Sllas B. Brownell, was clerk.

"The Thing Known as Man," "No prohibition," says the proud clause in a woman, "was ever so vigilantly guarded from its arch enemy as this settlement by the men." The combinations of the—thing that is known as man.

An Australian newspaper says each woman buyer is obliged to sign a clause in her title deed of ownership so phrased as to prevent any future selling of the land to any male. No man is to be permitted to own stock or at any time, directly or indirectly, to hold office in the great agricultural enterprise of emancipated women.

The stories say all the capital required has been subscribed, and that fourteen homesteads are already occupied.

**Bribery Legal.**

Toronto, Jan. 7.—It has just been discovered that by a peculiar device the overlapping of liquor license municipal acts, bribery in connection with local option contests in Ontario is legal, there being nothing about bribing voters on local option laws.

will sail south aboard the Roosevelt, the same ship which enabled Commodore Peary to reach the North Pole.

It also appears probable that at least three of Peary's most efficient men will be leaders in the search for the earth's southern pole. They are Captain Robert Bartlett, Professor Donald McMillan and George D. Cook.

**Church Destroyed.**

Quebec, Jan. 7.—The parish church of St. Catherine in the North County was totally destroyed by fire at about yesterday. The presbytery, which had joined the church, was saved. Half the fire originated is as yet unknown.

**Too Many Pills.**

Sault Ste. Marie, Ont., Jan. 7.—The four-year-old daughter of John W. Burns, engaged with his wife in a lumber camp back of Sault Ste. Marie, held of a box of widely-advertised pills and ate the entire contents, dying shortly after in convulsions. Inquest will likely be held.

**IMPORTANCE OF UNIFORM BUILDING  
CODE FOR USE IN CITIES RECOGNIZED BY  
NATIONAL BOARD OF FIRE UNDERWRITERS**

[illegible]

### Requisites in Making Codes.

The adoption of a building code in a city where practically no building regulations exist, or the substitution of a modern and complete building code for an antiquated one, is undoubtedly a radical measure in the sense that it proposes a doctrine or principle of making radical reforms in local government organization and policies and methods. It does not demand the services of a reformer or politician who advocates a new order, for such a person would do more harm than good. No politician should ever be allowed to enter into the question of a building code, for the direct interest of the people, and for the greatest good of the greatest number, and will be so recognized. The advocacy of such a measure by individuals, who may be thought to have even an indirect interest in the adoption of a building code, should be free from a suspicion of personal motives—much as, lawyers say, into court must go clean hands. And so, then, the question arises, "What is the great public work? The fire engineers is the correct answer, and why?"

In every city the fire department is the most popular people. None brave, none so popular, as the firemen. The chief is a public idol in fact, for every instance. To him is committed the responsibility of the safety of the respect of all citizens, and in his every man, woman and child has a feeling of protection and reliance upon him. The chief has the personal acquaintance of every important city official and the mayor, city attorney, aldermen, and the police chief. His authority are easily accessible to him. From whom more appropriately than from the chief of the fire department should the city government be asking the adoption of a proper building code? If behind the chief of one city stand his brother chiefs of other cities, how potent that influence would be, and how surely success would crown the labors of such an endeavor. The chief of the fire department understand this work is apparent. The fighting of fire is his life work, the prevention of fire should be his study. From the insurance com-

During the coming year the subscribers to The Standard in the city of St. John alone, we do not say the readers of The Standard, because we must reckon at least four readers besides the subscriber in every family, but the subscribers in the City of St. John alone, are going to be compelled to spend for the bare expenses of living the sum of \$20,000 per week, or the really tidy sum of more than

ONE MILLION DOLLARS FOR THE YEAR

Three-quarters of our subscribers will spend that much more for luxuries, bringing the total above Two Million Dollars, and you have still to reckon with the non-subscribers. These are sons of the families, who read the paper, and are earning their own money, and making their own expenditures. A low estimate of their spendings for actual necessities brings the money expended within the sphere of STANDARD influence, up to Two Million and Ten Thousand Dollars per year on a **very much underrated estimate**

WHICH SIMPLY MEANS

That STANDARD advertisers in 1910 will receive this output, because most STANDARD subscribers read it as their morning paper exclusively. If you want to have a say in the disposal of nearly Three Millions of Dollars, and if you believe you can make your ads. direct some of the \$30,000 per week into YOUR HANDS ring up Main 1722, and ask for
