## STATEMENT OF SESSION.

---

In accordance with a resolution adopted in meeting of session last year the congregation has been divided into districts, a district being assigned to each elder, whose duty is to acquaint himself with the families and with each individual in his district, to learn of cases of sickness or destitution of any kind and report the same, and to call upon each member the week previous to communion and leave with them their membership card.

The session are pleased to notice that the effect of carrying out this arrangement has on the whole been good and that in some individual cases the benefit has been very decided.

The Sacrament of the Lord's Supper has been observed three times during the year under most favorable circumstances, and it is believed with much spiritual profit.

The Session note with pleasure an increase in the number of families and members connected with the church, and also an increase in the contributions for the support of ordinance and for the schemes of the church.

It is a cause of regret that not a few members and adherents contribute little, and some nothing whatever, to the cause of the Lord.
