Dr. Neil Paterson
 Party Leader, Natural Law Party

Invitation to the Youth to Create a Unified Canada through Yogic Flying

Those who want an alternative approach to preserving the unity of Canada are invited to learn Yogic Flying and experience bubbling bliss while creating harmony in national consciousness

Yogic Flyers experience bubbling bliss, while creating peace and harmony in society

The result of the October referendum and the growing disharmony in the country have made it clear that we need a new approach to create unity and harmony in Canada. During the 1993 federal election, the Natural Law Party offered a profound new approach to governing, which would create a new Canada: a strong, united, harmonious nation with a perfect government capable of satisfying the diverse needs of all Canadians. Had Canadians chosen to vote for the Natural Law Party we would not be facing our current crisis.

Strengthening the Unifying Power of Government

The Natural Law Party is not a political party whose policy it is to depreciate the government in any way. However, it is clear that the unifying power of the federal government is weak. If our leaders are to succeed in their laudable efforts to preserve our country then we need to strengthen unity and harmony not only in the government, but throughout the whole nation.

New Approach to Unity

Therefore I am inviting the young people of Canada to not leave the future of the country solely in the hands of the government but to join me in taking a new approach to preserving the unity of the country based on knowledge and application of profound principles of Natural Law.

Natural Law Upholds Unity and Diversity

The ability to maintain unity and harmony while satisfying the diverse needs of the individual belongs to Natural Law alone. It is Natural Law that administers the infinite diversity of our universe while maintaining perfect order and harmony. Natural Law always upholds both unity and diversity.

Yogic Flying Enlivens Unifying Power

The Natural Law Party offers a scientifically proven program—Yogic Flying, an advanced program of Transcendental Meditation—to enliven the unifying power of Natural Law in our nation.

Since our government is just the reflection of the quality of national consciousness, a more coherent national consciousness produced by the Yogic Flyers will strengthen the unifying power of the government and give it the ability to satisfy the needs and aspirations of every individual and cultural group in the nation.

Reducing Collective Stress

By enlivening Natural Law in collective consciousness, Yogic Flying creates an influence of harmony that dissolves overall stress and tension in society.

Large groups practising Yogic Flying would immediately dissolve the stress, discord and divisiveness in national consciousness. The result would be increased cooperation and peacefulness and reductions in conflicts and the numerous social problems that arise from built-up tension in society.

Problems Due to Violation of Natural Law

All problems of society are caused by the violation of Natural Law by the whole population. This creates negative trends such as crime, ill health, economic stagnation, breakdown of the family and even cultural tensions and disharmony.

Every Canadian must be educated to live in accord with Natural Law. Yogic Flying brings support of Natural Law to the individual and, when practised in groups, will restore positive and harmonious trends throughout the country.

Discovery of Total Intelligence of Nature in Human Physiology

Recent discoveries in the field of physiology have revealed that human physiology contains within it the total potential of Natural

Law and that Yogic Flying enlivens this total intelligence of nature inherent in the human physiology. I encourage all Canadians, young and old, to study this remarkable discovery by Tony Nader, M.D., Ph.D., in his newly published book, entitled, *Human Physiology: Expression of Veda and the Vedic Literature*. (To order, see below.)

Appeal to Young People

I appeal to the young people of Canada to become Yogic Flyers and experts in Natural Law because the future of our nation is in their hands. They should not leave it to the current leadership of the country to resolve Canada's problems as that could mean that the country as we know it will no longer exist. Let us not allow this situation to deteriorate even further. Take action now to ensure a bright future for yourselves and our dear Canada.

Appeal to Parents

I also want to make an appeal to all parents, who do not want their children to suffer in life, to support them in taking up this science and art of creating harmony in our nation. Yogic Flying integrates mind and body and unfolds the creative genius within everyone. By practising Yogic Flying your children will enjoy growing happiness and peace in their own lives and will serve to preserve this wonderful nation that you have worked so hard to build.

Benefits of Yogic Flying

More than 500 scientific studies have validated the following benefits of Transcendental Meditation and Yogic Flying

For the Individual

- Increased happiness and self-confidence
- Decreased stress and anxiety
- Increased intelligence and creativity
- Improved academic performance
- Increased job performance and job satisfaction
- Reduced incidence of all categories of disease, including heart disease and cancer
- Improved personal relationships
- Reduced use of alcohol, cigarettes, and drugs

For the Nation

- Reduced collective stress and conflict
- Strengthened national unity
- Reduced crime and violence
- Improved national economy—reduced inflation and unemployment
- Decreased drop-out rate, increased desire for higher education
- Reduction of health care costs by 50%
- Improved quality of city, provincial, and national life

Strong Unified Canada

Here is a call to the young people of Canada—the future leaders of the nation—to wake up now and take effective action, or to continue living in uncertainty about your future and the future of our country. With the support of Natural Law you can fulfill your dream of a strong unified Canada in which all its peoples find fulfillment for a happy, prosperous life and at the same time feel secure in the integrity of their own language and cultural values. Canada can be a model of an ideal nation in which peoples of all races, cultures, and religions live together in peace, harmony and prosperity.

Canada Needs to be Rebuilt in Accord with Natural Law

The most ancient textbooks of Natural Law—Veda and Vedic literature—place great importance on the orientation of the entrance to a building and a country. In these texts, it is stated that a southern entrance (an entrance that faces south) is inauspicious, interferes with the support of Natural Law, and brings negative and destructive influences to the country or to the inhabitants of the building.

However, the Parliament Buildings in Ottawa have a main entrance to the south and most of our border entrances are from the south. In order for our government to be effective and to improve the good fortune of Canadians and our country as a whole, it is very important to close south entrances to Parliament and for Canadians to refrain from using any south entrances to their homes, office buildings, and towns. Unless we reconstruct our country in accord with the principles of the ancient Vedic system of building in harmony with Natural Law, problems and misfortune will continue in our government and our nation.

I invite all city planners and developers to take up this call to redress the violation of Natural Law created by improper design and construction of our homes and cities. Until now, this knowledge was not known. But now that it is available, I urge all Canadians to take advantage of these simple, but profound principles of Natural Law to ensure good health, prosperity, and good fortune for themselves and their families.
