Preface.....	vii
Part I. Roads and the Materials Used in Their Construction.	
CHAPTER I.	
Introduction.....	1
CHAPTER II.	
Types of country roads.....	2
Earth roads.....	2
Sand-clay roads.....	3
Gravel roads.....	3
Cost of gravel roads.....	4
Water-bound macadam or broken-stone roads.....	5
Comparison of the effects of traffic upon gravel and macadam roads.....	6
Cost of water-bound macadam road.....	8
Bituminous macadam roads.....	9
Cost of bituminous macadam roads.....	10
Concrete roads.....	11
Cost of concrete roads.....	11
CHAPTER III.	
Materials used in the construction of roads.....	12
Broken stone.....	12
Principal rock types.....	12
Igneous rocks.....	14
Sedimentary rocks.....	16
Metamorphic rocks.....	17
Methods of testing rock materials for road-making.....	17
Hardness.....	18
Toughness.....	19
Abrasion.....	20
Cementing value.....	20
Absorption.....	21
Specific gravity.....	22
Comparison of the value of different rocks in road building.....	22
Traps and felsites.....	28
Gabbroic and granitic rocks.....	28
Limestones.....	29
