The Charter Market

New York, July 15 .- The demand for full cargo steamers is light and the few freights offering are of a miscellaneous character and not confined to any particular trade. Charterers' ideas of rates are considerably below those of owners and some are with

holding their orders in anticipation of a material decline in the near future.

The sailing vessel market is also easier and there are fewer enquiries for off-shore vessels. Rates are quotably lower in some trades and the supply available boats is ample for shippers' requirements. New Jersey & Pennsylvania for unpaid taxes. This will be done with the approval of the Public Service portioned off to employes at the amount which it con ion and promises an early rehabilitation of the road.

As a further measure of economy an order on the Pennsylvania Lines West requires that a count be of room, inside and outside their houses kept on the distribution of the monthly book of folders, the estimated cost of each being five cents. Hereafter they are to be issued quarterly, any subseque

changes in the operation of trains to be shown in

Missouri Supreme Court has overruled Attorney-General Barker's motion for a rehearing of the case against the Chicago & Alton, seeking to recover \$2,-000,000 for alleged overcharges in freight and passen-This finally disposes of this suit and ger rates. probably of eleven similar suits filed against other roads in the state.

Recently two work trains of the maintenance of way department of the Lehigh Valley loaded in one day rom alongside the company's main tracks 171,988 feet of 90-pound steel rails, weighing 2,303 tons, and sufficient to law 16 29 miles of track. The cost of the work was 15.7 cents per ton. On another day a work train loaded in the same time 149,466 feet with joints as follows:--omplete, weighing 2,001 tons, or enough to build 14.11

miles of track, the cost being 15.6 cents per ton.

C. W. Hillman, an expert accountant employed by the state commissions which are opposing the West-ern railroads in their attempt to obtain higher passenger rates, testified on cross-examination yesterday at Chicago that the ratio of expenses for conducting passenger service is lower than that for freight. "Isn't your theory opposed to all accepted theories of all railroad men and commissions?" asked Charles Donnelly, attorney for the Northern Pacific. "Yes," replied the witness; "I was surprised at the result of my computations myself."

The Grand Trunk Pacific is about to use oil as

fuel for engines operated on its Rocky Mountain di-vision, both for greater efficiency and to minimize the danger of fires in the forests of Western Canada. Of unusual importance is the decision of the United States Supreme Court sustaining the St. Paul in its obedience to an injunction of the Federal court restraining it from law, because in the original status has no conscience where railways are concerned, a of the case the Minnesota Suprems Court undertook that if any man gets the better of a ticket agent to punish the road for contempt and in its proceeding ignored the injunction. In the meantime the high-

court has held the passenger rate law valid and which frequently has such money refunded-a p t will be obeyed.

The Grand Trunk station and restaurant ed the passenger department, in Montreal, the oth were destroyed by fire at Alexandria, yesterday afternoon. RAILWAYS ATTEND TO SOW THISTLE.

It is known that on the railway right-of-way nany towns and villages in Saskatchewan, Perennial Sow Thistle has gained a foot-hold. Eradication of these small patches will save the adjoining districts many thousands of dollars. It is to the interest of every farmer to see that these patches are taken in hand at once. If the farmers and business men i

the community are not sufficiently alive to attend to matters of such moment, it would seem of little interest to anyone else. Nevertheless, for this year, through special co-operation between the C. P. R. and the Department of Agriculture, every hamlet, village,

town and city on the line will be inspected by an official of the Department of Agriculture. Some patches will be dug out, and the larger patches will be treated as may be necessary. Every patch will be charte nd the municipal official will be asked to give spe cial attention to them.

To help in this work the C. P. R. is furnishing gasoline track motor car and a man to operate same The department is sending a man with each car, and all lines in the province will be covered. It is nated that the work on the C. P. R. lines will take hree months.

Howard Pawley, B.S.A., assistant to Weeds an seed Commissioner, has charge of the work on behal of the Saskatchewan Government.
