

*If It's a Pipe Machine You Need—Then  
It's a "B. & K." You Ought To Have*

**H**ERE are a few reasons—and you'll find more if you examine and compare these machines with others.

There's nothing radical in the design—nothing experimental. Not a single useless part. *The Gripping Jaws* hang on like a bulldog. *The Die Head* is ahead of all others.

LET US SEND A CATALOG.
