Whither Tending?

Editor Evening Telegram.

Dear Sir,-If there is one arran hypocrite in this city it is the editor of the "Daily News," that was how I ris's activity, one half of which is man that up to a year or two ago the same editor had nothing too had to say or think of, and the other half of which is a tirade of abuse upon a man from whom he was glad to accept kindness not many years before when he was in need of it. Mr. Robinson is continually preaching "sermons" to the public from his editorial pulpit as if he was far above the average run of political heelers, in this small community he is well known, and his "sermons" are valued by the general public accordingly. No one is troubled just now Jackman, in Wednesday's issue, there, House Road by a large tree falling on whether Premier Morris is particularly active, or ex-Premier Bond particularly slow, but what the country will want to know at the end of Sir from a watery grave. This man is wrenched off many houses and busi-Edward Morris's stewardship in about named Rideout and lives near Long ness places. The company's energetic two years' time is, what has been the Pond. Invulnerable Gibraltar

It Has a Battery Perhaps Unequalled in the World.

It has always been known that Gibraltar, which belongs to Great Britain, is one of the strongest forts for both defence and offence in the world. It is said that an immense eet could be sent to the bottom be re getting within five miles of Gibaltar. Not even a torpedo boat could ucceed in entering the bay unobserved on the blackest night. The most eminent naval experts are of the fortress is almost impregnable

Gibraltar never sleeps. By day and night two perfectly equipped signal stations, proudly flaunting Britain's flag of ownership, sweep the seas around to a distance of fifteen miles on a clear day, instantly reporting th oming and going of each vessel.

Modern "needle" guns, the finest

Surope, are installed on all the mos ominent points. They are unreach ble from the sea, even as they ar ndiscernable, owing to the skill wit which they are planted and draped t match the surrounding vegetation while huge screens drop automatical before them as each shell is fired They have a range of fifteen mile and could drop shells on Ceuta, i Africa, opposite, quite comfortably One gun weighs 110 tons and is cap able of throwing a shell weighin vel of engineering under great difficulties, the galleries, are concealed ouns for every day in the year

These galleries are divided three sections, entry to which is guarded, while one is closed even high officers, containing preserved stores, munitions of war, rain water few minutes. Dr. Fraser, who was attendance is requested. By order, (for Gibraltar has no springs) and a complete condensing plant-all cal-

> cally perfect imaginable. The surrounding waters are mapped out into squares, upon which certain guns are kept ready trained, so that it is a most impossible to miss.

13 5 Inch Guns Make Great Concussion

London, Sept. 23.—The battleship Orion's 13.5 inch guns have been ried with remarkable effects. So tremendous was the concussion that windows were shaken in Southsea, ten miles away. The structure of the ship withstood the test and showed to damage. All those engaged in th ring operations wore wool padder earlaps. Hardened glass skylights and portholes were fractured and the overings of canned goods in the hip's stores burst and much crocky was smashed. The decks were ot buckled by the blast, thanks to he manner in which they were specially strengthened, but the bottom f one of the ship's boats fell clean

Eight Children Burned to Death. Shocking Fire Tragedy in a Pennsyl

vania Town on Sunday Morning. Indiana, Pa., Oct. 2.-Eight childen of Mr. and Mrs. Wm. Dias, of Hespon, near here, ranging in age from 13 years to three months, were burned to death early Sunday when fire destroyed the family home.

The parents after discovering the flames left the children in their beds and went to the first floor, where they made an attempt to extinguish the fire. The blaze spread quickly, however, and they were unabel to reso the little ones

A New Life Preserver

A new life preserver, which has peen successfully tried, may be inroduced into the German navy. The paratus, which weighs five pounds and a half, consists of two swimming ushions bound together by straps. The cushions lie upon the breast and back. The apparatus is provided with a small lamp fed by a battery. The lamp can be fastened around the head with a band worn on the forevater can be seen at a considerable a reflector added, throws the light several hundred yards at night. several recent tests of life-saving a night the victims of the supposed shipwreck by aid of the lamp have been easily discovered The lifesaver can be buckled around the body in in five seconds. The lamp begins fastened. In case of catastrophes t warships the worth of the life-preerver cannot be over-estimated ot be advisable.-Consular Report

LAYING WATER MAINS. - Conractor George Quigley started work resterday morning on the new water nain which is to be laid on Cornwall Avenue. The job will be a big one and is being done under the careful uperintendence of Engineer Ryan.

HY should I buy a roofing that needs to be painted every lit-tle while to keep it tight, can buy AMATITE which needs no painting?"

The outer surface is composed o real mineral matter, which makes painting unnecessary.

With an Amatite Roof on your building you end your roofing trou-bles. When you buy a roofing that requires frequent painting you begin them. Smooth roofings that require paint

g are a nuisance and an expense. hen you buy them, you buy trouble not protection. FREE SAMPLE

We should be glad to send you this sample and booklet immediately.
