> A CRYING NEED. [London Financial News.]

Sir Wilfrid Laurier has been earning golden opinions during his visit to this country. He has shown a thorough desire not only for the advancement of the Dominion but also for a still greater increase of trade between the mother ountry and her eldest child. There is, however, one serious impediment in the way of commerce between the two countries, which, it is to be hoped, he will take up on his return to Canada, and the removal of which would raise him higher in the estimation of commercial men. We refer to the crying need for a uniform insolvency act for the whole Dominion. At present each province has its own law on the sub-ject, and under some of these preferential payments are by no means of infrequent occurrence. This, it is needless to say, has a very bad effect on government the necessity for such leg-islation. A bill, in fact, was once ment, but was thrown out. Were the present government to pass such a measure it would add additional lustre

The cause of the fire is a mystery as there had been no fire in the house other than by gas stove, for som weeks. Some electric wires pas pass rough the roof, and it is possible that this may have caused the fire. No prisoners had access to this part of the building, which is separated from the prisoners' quarters by a thick firewall. The prisoners held a great about thirteen years ago.

Bargain Day—

EOPLE sometimes say—we have heard some people say it-that there must be some trick about our Friday bargain prices, that really good goods could not pos. sibly be sold for so little. These people know nothing of our great policy. When you understand that policy you will easily grasp the why and the wherefore of these prices.
