Take the Cast Iron Combustion Chamber, for instance

I make it heavily corrugated (or fluted). This almost doubles the heating surface - enables practically twice as much air to be heated with the same amount of coal or wood.

As the combustion chamber is really a continuation of the fire-box, I make it of extra heavy iron, corrugated to allow for the contraction and expansion and to ensure greater durability.

Then my FUSED JOINTS make the "Hecla" dust-tight, smoke-tight, gas-tight. Write for catalogue of "Hecla" Furnaces and Peninsular Stoves and Ranges. Send me a rough sketch of the house, and I will send you an
estimate of the cost of installing a "Hecla" in estimate of the cost of instaliting a "Hecla" in
your home. All free. Address the "Hecla your home. All free. Address the "Hecla
Furnace Builder," care of
