Henry Allen to J. J. Dixon & Co.: Bank of Eng land's rate of discount was raised to-day from 3 to 4 per cent. The effect of the annoucement upon street was reflected in events of the market a street was reflected in events of the market a few days ago rather than to-day. It was in fact then discounted in part and the positive direction to a downward plane has been followed ever since, the quotations at the end of each day being somewhat below the standard at opening. The announcement was accepted as a mere formality, the conditions which mane it im formality, the conditions which made it imperative being already known and acted upon. Nor is it likely that for a few weeks to come any change in the general direction of prioss may be expected. It is possible that for its protection the bank may deem a further advance necessary, and it so it will come promptly; if not, the crisis if it may be called more than an incident of its ordinary history, will soon have been passed and it is not improbable that the turning of the tide in England will be coincident with the happening of the same event here, then buils will be heard from, but from now til then what will happen.

BREAKFAST.

GRATEFUL-COMFORTING

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' tills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hunareds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may secape many a fattal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. JAMES EPPS & CO., Hom monathic Chemists
