

ment by gynecologists of to-day, but in the past by no less an authority than J. Marion Sims, who prescribed it and recommended its employment.

Hayden's Viburnum Compound is not a narcotic and contains no habit-forming drugs. It is a product of known composition and as a uterine sedative it holds first place in the opinion of many physicians as not only a dependable therapeutic product, but a remedy which is safe to administer to their patients. Given in teaspoonful doses, administered in hot water, it will prove most effective.

CELL NUTRITION.

All classes of cells are made to live and perform their several functions by the phenomena of cell nutrition; and whenever malnutrition, intoxication, or other causes, impair the special function of cells, they do so by producing some intrinsic metabolic defect. Agents which will directly or indirectly repair metabolic defects are true cell tonics. A very large experience and a close and careful clinical study of all pathological conditions show conclusively that Bovinine is an ideal cell tonic and food. It stimulates the cells to healthy proliferation. It tones the newly born cell, giving it a full and normal power of absorbing, and immediately meets this demand by studying a full and complete nutrition.

THE PNEUMONIA CONVALESCENT.

In spite of all of the modern advances in scientific therapy, and the improvements in the general handling and management of acute infectious diseases, acute lobar pneumonia still deserves the title ascribed to it by Osler: "The Captain of the Men of Death." There are, however, especially during the fall and winter months, many cases of the lobular or irregular pneumonia that so often complicates or follows la grippe. When this condition supervenes it is more than likely to follow a sub-acute or chronic course and convalescence is frequently long delayed. Under such circumstances, in conjunction with treatment designed to hasten resolution, a general blood tonic and vitalizing agent helps materially to shorten the convalescent period. Pepto-Mangan (Gude) is of much value in this field, because it not only increases the solid elements of the blood, but also acts as a true tono-stimulant to the organism generally. As Pepto-Mangan is free from irritant properties and constipating action, it is especially serviceable in the reconstructive treatment of the devitalization following the pneumonia of the aged.
