

GRANULATED LIDS.—Dr. Neznamoff's custom in treating granulated lids is to paint the mucous membrane of the lids with a solution of pure iodine mixed with liquid vaseline (oleum petrolei) twice a day. In chronic cases he uses vaseline containing from $\frac{1}{2}$ to 1 per cent. of iodine. In about four days improvement begins, and in about twenty a cure is generally effected.—*Medical Times and Hospital Gazette.*

FILLING OF CHILD'S TEETH NOT URGENT NECESSITY.—While extracting of a tooth in relief of a toothache may be reasonably within the agency of a person with whom a child is temporarily residing apart from its parents to require, and thus obligate the father to pay for, the appellate term of the Supreme Court of New York holds, in *Ketchum v. Marsland*, November 25, 1896, that such agency does not extend to the employment of a dentist

to fill and regulate the position of such a child's teeth, it not being deemed such an urgent necessity as to warrant such a course. However, the court holds the father liable in this case because of his ratification of what was done by not communicating any dissent to the dentist during three years that elapsed after he sent in his bill.

ONTARIO Vaccine Farm.

ESTABLISHED 1885.

Pure and Reliable Vaccine Matter always on hand. Orders by mail or otherwise promptly filled.

10 Ivory Points, \$1.00; 5 Ivory Points, 65 cts.; single Points, 20 cts.
