**BYAM'S**  
Improved "Common Sense"  
**SASH BALANCE.**  
**LOCKS AND LIFTS.**

The only practical substitute for weights invented. The most durable, the cheapest and best device for all ordinary window. Balances when in position are entirely out of sight. No rivets, bolts or screws are used in putting it together so that nothing can get out of order or need repairing. No cutting, boring or nailing of the sash, as the Balances are let into the jamb. Especially valuable for repairing old buildings as they can be put in at a trifling expense, as easily put in old buildings as new ones. Sash can be removed from frame in a moment for cleaning or repairing broken glass. Can be used where it is impossible to use weights or other fixtures. No unsightly cord wearing paint off side of frame. No rattling of sash as pressure against sash prevents it. No rattling of weights or pulleys when Sash is raised or lowered. No sticking of weights in frame. No cords to run off, wear out and break. No roller rollers to become flattened by standing in one position for some time. No rimmy coil spring or delicate mechanism to break, wear out or get out of order. Its simplicity of construction and operation is the wonder of all.

Byam's Automatic Sash Locks (self fastening) and Sash Lifts or upper and lower sash are the best and cheapest in the market.
