*A Scientific and Philosophic Study  
of the Drink Question.*

By AXEL GUSTAFSON.

Cloth, 600 pp. \$1.50, carriage free.

to one extreme or the other, and it discusses the

exhausts the subject. — *Boston Advertiser.*

**The New Psychic Studies**

*In their Relation to Christian Thought.*

By FRANKLIN JOHNSON.

These studies relate to what is commonly known as  
thought-transference, somnambulism, mesmerism,  
clairvoyance, spiritualism, apparition of the living,  
haunted houses, ghosts, and Buddhistic occultism.  
The researches, here carefully noted, have been chiefly  
carried on under the direction of the British Society  
for Psychical Research. The *Episcopal Recorder*,  
Baltimore, says: "We think it quite valuable."

**Scientific Sophisms.**

*A Review of Current Theories Concerning  
Atoms, Apes and Men.*

By SAMUEL WAINWRIGHT, D.D.

12mo, cloth, 302 pp. \$1.00, post-free.

"The sophistical reasoning by which it has been  
attempted to give some scientific credibility to the  
doctrines of Darwin and his school is exposed in a  
trenchant and telling way. He lays his hand at once  
upon the fallacy and drags it into the light. He fortifies  
his position with testimony drawn as well from the  
evolutionist himself as from his opponents."—  
*The Standard, Chicago.*
