**UNIVERSITY OF TORONTO****FACULTY OF MEDICINE**

**T**HE regular course of instruction consists of Four Sessions, of eight months each, commencing October 3rd. There is a distinct and separate course for each of the four years.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honor course in Natural Science are able to fulfil the requirements of the primary work in medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

Attention is directed to the efficient equipment of the University laboratories for instruction in the practical subjects of the Medical curriculum. The new building of the Medical Faculty has been completed at a cost of \$175,000.00 in the Queen's Park, and affords extensive laboratory accommodation for Pathology and Physiology which is unsurpassed. The lectures in the final subjects are also delivered in the new lecture theatres. Instruction in the other subjects of the medical course are taught in the various science laboratories and lecture rooms of the University.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University under the direct supervision of the Professor in charge.

The Faculty provide three medals for the graduating class (one gold and two silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.
