Dr. F. G. Finley,
273 Bishop Street,
Montreal.

Dear Dr. Finley:-

I am attaching herewith an anonymous communication received by me with reference to Professor Barbour.

I may say that some time ago I heard the same criticism and spoke to some of his associates in the Science branches of the Medical Department, but they were not able to tell me very much. I would like if either you or Dr. Scane, or both, would attend one or two of Professor Barbour's lectures and let me know the merit there is in this criticism. It might be well to speak to Barbour. Doing so could do no harm and might do a great deal of good. I advise no delay in the matter.

Yours faithfully,

Principal.
