

THE BIRDS OF MONTREAL

BY

ERNEST D. WINTLE,

"ASSOCIATE MEMBER OF THE AMERICAN ORNITHOLOGISTS UNION."

Birds observed in the vicinity of Montreal, Province of Quebec, Dominion of Canada, with annotations as to whether they are "Permanent Residents" or those that are found regularly throughout the year; "Winter Visitants," or those that occur only during the winter season, passing north in the spring; "Transient Visitants," or those that occur only during migrations in spring and autumn; "Summer Residents," or those that are known to breed, but which depart southward before winter; and "Accidental Visitants," or stragglers from remote districts; giving their relative abundance as to whether they are rare, scarce, common or abundant; data of nests and eggs when found, and especially noting the species that breed in the City and Mount Royal Park; also data of migratory arrivals and departures, and other notes, all of which are deduced from original observations made during the past fifteen years.
