

DRAWING-BOOK EXERCISE VI.

Vases to be Completed: Figs. 8, 9, 10.

DIRECTIONS FOR FIGS. 8, 9, 10. — Here are the left halves of three vases perfectly drawn: the pupil is to add the right halves, making them exactly like the left, except that, in Fig. 10, the right ring will not be drawn. These figures will show that lines on vases and similar objects should be drawn *tangential to the contour*; also that concentric circles, when viewed obliquely, are *not* to be drawn as concentric ellipses, but as shown by the tops of vases 8 and 9. Call the particular attention of your pupils to these things.

Compare the drawing of these vases with the drawing of those on page 141. The latter are geometrical representations, as required by the manufacturer; while these are perspective, or pictorial representations.
