CLAUDE CLARKE CALLED BY DEATH

Assistant Treasurer of the World Succumbs After Operation.

WAS PROMINENT MASON

Entered World Office as a Boy and Earned Advancement to Late Position.

Richard Claude Clarke, who was an employe of The Toronto World for the past twenty-one years, died at his late residence at 85 Grenadier road from blood poisoning at 7 o'clock last night, after an operation for appendicitis. On June 14 Mr. Clarke underwent the operation at the General Hospital and it was thought at the time that he would recover. He returned to his home on the 24th and seemed to be gaining in health steadily until July 1,

THE LATE R. C. CLARKE.

when he complained of feeling ill and took to his bed. It was not until Tuesday last that the worst was feared.

Mr. Clarke was born in Toronto and started his business career at the age of 16 with The World. He advanced steadily and at the time of his death occupied the post of assistant treasurer.

Altho seemingly well, he had for the past three years complained of severe pains in the head, and on the advice of his doctor, paid a visit to England last year, where he consulted a specialist for nerve trouble. Since then his health appeared to be good. He was a prominent member of the Doric Lodge, A. F. & A. M., and leaves a wife and one son aged ten. The funeral will take place on Monday at 2:30 from his late residence to Mount Pleasant.

New York Stock Talk

Compiled in New York Especially for The Toronto World

NEW YORK, July 9.—The favorable influence of the government's remarkable crop report was off-set to some extent in the stock market today by the ominous weakness in Missouri Pacific and the other Gould issues and by the decline in New York, New Haven and Hartford stock to 61 7-8,

the lowest price in the history of that corporation.

The selling in New Haven was liquidation of the genuine sort. It came from New England and was doubtless impelled by the fear that the prospects of a return of the property to a dividend basis would become even more remote than they are at present if the department of justice persists in filing its threatened dissolution suit.

Missouri Pacific broke thru the low price established on Wednesday, shortly after the opening today and on heavy transactions plunged down to 11, whence it rallied only feebly at the close.

Denver and Rio Grande and Western Pacific 5 per cent. bonds were equally

weak and a slight recovery in the former have was due wholly to retirement of short contracts. There was no evidence of any sort that the financial sponsors for these companies are giving any support to their securities in the market. The speculators took whatever liberties they pleased with them and are wholly responsible for their fluctuations.

HOLIDAY SUGGESTIONS—HELPS TO PLAN AN OUTING.

"Where is the best place to go?" is a frequent question at this time of the year.

The expansion of Canadian Northern lines has made the solution simple. Expert information cheerfully given about good fishing, boating and camping at places easily and quickly reached. Amongst these are—the Rideau Lakes, Central Ontario Lakes, Bay of Quinte, Sparrow Lake, Muskoka and a hundred small lakes along the line. For game fish you cannot beat those northern rivers, the Magalloway, Pickering and French at this time of year. Just discovered—a new lake alive with bass. Who wants the pointer? For tickets and all informa-

tion as to service, fares, etc., apply to City Ticket Office, 52 King street-east, M. 5178, or Union Station, Adel., 2488, 248

Scientific tests have shown that in occupations employing the larger muscles, women tire more rapidly than men, while in work in which smaller muscles are used they are more efficient.

Time-drying photographs are made by a French scientist on fine-grained stone, which is coated with enamel and baked at a high temperature after the photographs are printed.

A chemist in Belgium, by taking the albumen from the residue of malt grains and putting it thru a process, is said to have produced a pasty food, which tastes like meat, but with three times as much nourishment. The cost of Brussels have experimented on men with it, and with excellent results.

parallax measurement at the Yerkes observatory that the distance of the recently discovered star Nova, in Cassiopeia, is 200 light years away, and that the sudden blaze of the brilliant star in 1913 corresponds to some catastrophe which occurred in the beginning of the seventeenth century.

A new rapid telegraph system is in use between Nice and Boulogne. The message is written on a piece of sensitized paper by means of a beam of light.

A group of French scientists who have been investigating have decided that small insects, in proportion to their size, are stronger than larger ones. In an aviation school in Berlin the machines are suspended from a circular track until the students learn enough to be trusted to operate them free from control. By introducing minute particles of zinc into the tissues by powerful electric currents a Philadelphia surgeon destroys cancers and has effected many notable cures.
