**THE NIAGARA SUSPENSION BRIDGE.**

The International Railroad Suspension Bridge—one of the most magnificent structures of the kind in the world—was erected in 1853-4, and was designed to connect the Great Western Railroad of Canada with the railroads of the State

of New York. The bridge spans a narrow part of the Niagara river, two miles below the celebrated Falls of Niagara, and three-quarters of a mile from the Whirlpool. The east end of the bridge commands a fine view of the Falls, and of the rapids under and below the bridge. The water of these rapids, where
