

(2) Manifestations of the various forms (modes) of force on matter.	
A.—Magnetic and Thermal effects of Electricity ..	127
B.—Molecular (Voltaic) Electricity, and the Material Elements of compound matter	132
C.—Caloric-Force and Matter	139
D.—Magnetism and Magneto-Electric Force	142
E.—Magnetization of Light and Dia-Magnetism..	148
(3) The Material World and the Universe	157
Conclusion	160

APPENDIX.

(1) Herschel's description of the Eclipses and Occultations of Jupiter's satellites	163
(2) Tyndall's Observations on the Ether of the Undulatory theory	167
(3) Appendix to the Allied Manifestations of Force on matter.	
a.—Magneto-Electric Force	173
b.—Volumetric Electricity	177
c.—Physical and Chemical Effects of Molecular Electricity	191.
d.—Acoustic Force, Motion and Electricity	195
e.—Dynamical effects of Electro-Magnetism	198
(4) Subjective applications of Electric Force to mechanical purposes	208
The Coal supply. The Past and Future	214
